JOSEPH M. GLEASON, Treas. PETER M. MILLER, Sec'y

Seeds, Bulbs, Plants and Agricultural Implements

32 SOUTH MARKET ST., BOSTON

and Mr. J. M. GLEASON (so many years associated with Messrs. Schlegel & Fottler and their successors, the Schlegel & Fottler Co., as directors and managers) with our house, and we trust their friends and customers whose confidence they have secured through many years of honest effort and careful attention, will extend to them in their new relation the same confidence and liberal patronage as shown them in their former connection.

THOMAS J. GREY CO.

Remarks to Purchasers

A large part of our seeds are grown for us on contract by special growers, from our own stock, and in locations best suited for their development. Others are secured from strictly reliable sources, and constant effort is made to secure only the best.

WE ARE THE ONLY HOUSE IN NEW ENGLAND carrying a full stock of Seeds, Tools, Implements and Repairs for the wants of the RETAIL TRADE EXCLUSIVELY.

FREE DELIVERY.—We send to any part of the United States all vegetable and flower seeds quoted in this Catalogue, at packet, ounce, quarter-pound, half-pound and pound rates free of expense to the purchaser, by mail or express (at our option). All heavy seeds, including peas, beans, corn, clover seed, seed grain, roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover postage, at the rate of 8 cents per pound or 15 cents per quart. Particular attention is invited to this, as, when omitted, the cost of postage will be deducted from the amount received.

We deliver free, by mail, in Canada, all vegetable or flower seeds ordered at packet, ounce or quarter-pound rates. For seeds in larger quantities, customers should remit 16 cents per pound for postage.

ADDRESS, ETC.—In ordering, please use the order sheet, which we send with each catalogue, and be particular to sign your name, also that of your post office, county and state, plainly; also mention the mode of conveyance you prefer. In the absence of instructions, we shall select what we consider the most desirable way, but can assume no responsibility.

EARLY ORDERS.—It is essential that customers send us their orders as soon as possible after receiving this catalogue, and thus avoid the rush incidental to the planting season. It frequently happens that some varieties or articles are not in store when orders are received. In such cases we forward such as are ready, and the balance as soon as possible.

REMITTANCES may be made by Draft, Money Order, American Express Company's Money Order, or Registered Letter. Postage Stamps may be sent for moderate amounts.

PLANTS AND SHRUBS cannot be sent C. O. D. unless we receive a remittance on account to guarantee acceptance.

PRICES, ETC.—Prices quoted in this list are subject to change during the season. We are always pleased to quote and submit samples upon request.

ORDERS FROM UNKNOWN PARTIES, to insure prompt attention must be accompanied by a remittance, or by satisfactory reference to some responsible house or person in this city.

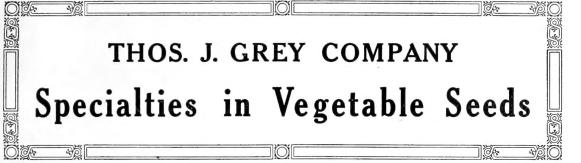

OUR TERMS ARE NET CASH.—All bills on which short credits are allowed are due the first of the month succeeding the date of the purchase.

CLOTH BAGS USED IN PACKING are charged at the following rates: Quarter-bushel, 8 cents; half-bushel, 10 cents; one bushel, 15 cents; two bushels, 22 cents.

We give no warranty, expressed or implied, as to quality, description, productiveness, or any other matter of any Seeds, Bulbs or Plants we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must be at once returned.

THOMAS J. GREY CO.

SITUATIONS FOR GARDENERS, FARMERS, ETC. We will be pleased at all times to receive inquiries from any person desiring the services of Gardeners, Farmers or Assistants. We keep a list of reliable persons wanting such situations, and recommend only such as we think are competent to meet the requirements of employer. We make no charge for our services.

BEAN, FORDHOOK BUSH LIMA.

The only strictly erect bush form of the popular "Potato" Lima. Both the pods and beans are twice the size of the Dreer Lima and are ready for the table nearly three weeks earlier than the pole varieties. The green beans, even when of full size, are tender, juicy and sweet when cooked, resembling the large flat Lima. Pt. 20 cts.; qt. 40 cts.; pk. \$2.25.

BEET, CROSBY'S EARLY EGYPTIAN.

We offer a superior stock of this very popular early variety. Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 30 cts.; 1 lb. \$1.00,

CARROT, DANVERS SELECTED.

The seed which we offer under this name is of exceptional purity, and can be depended upon to produce roots; stump-rooted in shape, of a deep orange color, and of fine texture. Oz. 30 cts.; 1 lb. \$1.00; 1 lb. \$3.00.

CORN, SWEET, GREY'S PERFECTION.

Ears somewhat larger than the Crosby and earlier. Very sweet, tender and delicious. Pt. 15 cts.; qt. 30 cts.; pk. \$1.75.

CORN, EARLY GOLDEN SWEET.

Early, very sweet and tender. Ears of medium size, 10 and 12 rowed, and retains its tender condition a long time before becoming tough. A favorite with our customers and growing in popularity. Pt. 20 cts.; qt. 35 cts.; pk. \$2.00.

CUCUMBER, GREY'S PERFECTION FORCING.

Especially recommended for forcing, although equally valuable for outdoor cultivation. Uniformly symmetrical in shape; dark green skin with white firm flesh of delicate flavor. A prolific variety. Pkt. 25 cts.; oz. \$1.00; 1/4 lb. \$3.00.

LETTUCE, SUTTON'S LITTLE GEM COS.

An entirely distinct Cos Lettuce, and a most valuable dwarf compact variety. Very dark green, small, solid, crisp, slow in running to seed, and of delicious quality. Pkt. 25 cts.; ½ oz. 60 cts.; oz. \$1.00.

ONION, SILVER BELL.

This novelty is the result of continuous painstaking selection, and is the smallest and earliest silver skin onion in existence, being 10 to 14 days earlier than Barletta. Pkt. 15 cts.; oz. 60 cts.; 1/4 lb. \$2.25.

ONION, SELECTED YELLOW GLOBE DANVERS.

A carefully selected strain of this valuable variety. Nearly globe shaped in form, slightly flattened on the bottom; skin of delicate straw color, and flesh nearly white, of fine texture and delicate flavor. The true type of the Globe Danvers Onion as grown for many years for the most critical buyers. Pkt. 10 cts.; oz. 30 cts.; ½ lb. \$1.00; 1 lb. \$3.50.

PARSLEY, GREY'S PERFECTION.

This is without doubt the best and most satisfactory parsley grown. Uniformly very fine curled and vigorous, and of a beautiful rich green color. Pkt. 15 cts.; oz. 40 cts.; ½ lb. \$1.25; per lb. \$4.00.

PEA, CARTER'S BUTTERCUP.

An excellent main crop pea of robust habit, maturing its crop nearly all at one time. Very prolific, as many as twenty-two pods having been picked from one vine. Quality excellent. 2 ft. high. Pkt. 15 cts.; pt. 30 cts.; qt. 60 cts.

PEA, GREY'S EARLY GEM.

An extra early variety. Very productive and of fine quality. Pt. 20 cts.; qt. 35 cts.; pk. \$2.25.

RADISH, GREY'S PERFECTION.

A superior selection somewhat resembling the French Breakfast in shape except it is somewhat shorter and thicker. The white tip is well developed and gives it a most attractive appearance. Very early and has short top. Pkt. 5 cts.; oz. 15 cts.; ½ lb. 50 cts.; lb. \$1.50.

TOMATO.

Comet. One of the best forcing varieties. Brilliant scarlet color, medium size, excellent shape and solid, good outdoor variety. The seed which we offer is from carefully selected fruit. Pkt. 20 cts.; oz. \$1.00; 1/4 lb. \$3.00.

TURNIP.

Carter's Little Marvel. A new early White Turnip. Globe shaped, flesh crisp and solid, very distinct in both habit and foliage and is a splendid table variety. Good for frame work. Pkt. 10 cts.; oz. 20 cts.

Grey's Model White. Remarkable for form, earliness and quality; highly recommended. Pkt. 10 cts.; oz. 20 cts.

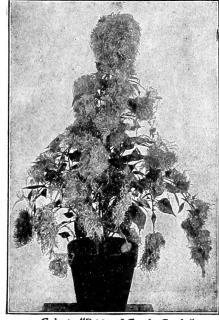

Mr. D. F. Roy, Superintendent for H. E. Convers, Esq., says: "I want to tell you how pleased I am with the grass seed you sent to me last season for use on our grass driveway. It could not have been better."

THOMAS J. GREY CO.'S

CHOICE VEGETABLE SEEDS

SEEDS BY MAIL. We deliver free of expense to the purchaser to any point in the United States all seeds quoted in this list at packet, ounce, ½ pound, ½ pound and pound rates, by mail or express at our option. Beans, Peas, Corn, Clover, Grass Seeds, Grains, etc., are quoted net at our store. If these are wanted by mail purchasers will please remit 15 cents per quart or 8 cents per pound to cover cost of postage.

We deliver free by mail in Canada all seeds ordered at packet, ounce and quarter-pound rates. For larger

quantities customers will please remit 16 cents per pound to cover postage.

ARTICHOKE (Artischoke)

One ounce will produce about 500 plants.

Sow seeds in April in good rich soil, in drills ten to twelve inches apart and about one inch deep. Plants should be protected from freezing during winter, and the following spring they should be transplanted, setting them three feet apart in moist, rich soil. Upon the approach of winter the stems and leaves should be cut away and the bed covered so as to prevent freezing. Artichokes can also be cultivated as annuals by sowing seeds in hotbed in February and producing strong, vigorous plants, which should be transplanted into moist rich soil in May.

ASPARAGUS (Spargel)

One ounce will produce 200 plants.

A deep, rich, mellow soil is best adapted to the growth of asparagus. It may be grown from seed or propagated by roots. Sow as early in the spring as the ground will admit, in drills from twelve to fourteen inches apart, and cover one inch deep; when the plants are well up, thin to three inches apart in the drills. Keep the plants free from weeds during summer, and protect slightly during winter.

The following spring, the roots will be ready to transplant into permanent beds; the roots should be set in rows three to four feet apart, and one foot apart in the rows; the crown of the root should be four to six inches below the surface of the ground. A fair crop may be expected the third year from the seed, or in one to two years when roots are used, according to the age of the roots planted. By planting two-year-old roots a fair crop may be obtained in one year, and after that a full crop every

year	Pkt.	Oz.	½Lb.
of excellent flavor	\$0.05	\$0.10	\$0.25
Giant Argenteuil. An early, large variety from France. Less likely to rust than others	.05	.10	.30

ASPARAGUS ROOTS

Conover's Colossal, Giant Argenteuil, Moore's Giant and Palmetto. Strong, two-year-old plants. Each \$1.00 per 100, \$7 per 1,000; if by mail add 40 cents per 100 for postage.

BEANS, DWARF OR BUSH (Busch-Bohnen).

One quart will plant 100 feet of drill. One and one-half bushels will plant one acre.

A warm, light soil is best adapted to the growth of Bush Beans, but they will do well in almost any situation, unless it be very wet. Plant in rows two or three feet apart, dropping the beans three inches apart and covering two inches. Keep the ground free from weeds and cultivate often. Never disturb the vines when wet, as the pods will become rusty. All the varieties are tender, and must not be planted until the soil is dry and warm.

If by mail add 15 cents per quart to cover postage. We furnish 10-cent packets of all beans except where noted.

very productive.....

BEANS, POLE or RUNNING (Stangen Bohmen)

One quart will plant about 150 hills.

All under this head require poles six to eight feet long, and should not be planted until the ground is warm, as they are more tender than the dwarf varieties. Plant about the middle of May, if the season is suitable. The Lima Beans are very susceptible to cold and wet, and apt to rot in the ground, and should not be planted until all danger from frost is over, and the soil is dry and warm.

If by mail, add 15 cents per quart to cover postage. We furnish 10-cent packets of all beans, except where noted, free of postage.

BEET (Runkel Rube)

One ounce will sow 50 feet of drill; five to six pounds an acre.

A deep, light, sandy loam that has been well enriched is best adapted to the growth of the Beet. Sow in drills, from April until July, sixteen inches apart, and about one inch deep; thin the plants to about three inches apart. The turnip-rooted are the best, and all early varieties are used extensively for greens.

BROCCOLI (Spargel Kohl)

One ounce will produce 2000 plants.

This vegetable closely resembles the cauliflower. A very rich deep soil is required to grow the broccoli to perfection; the seed should be sown early in the spring, and the plants transplanted into rows three feet apart with two feet between the plants.

		¼Lb.
Early Purple Cape. Heads of a greenish-purple color; close and compact, and of fine flavor \$0.05	\$0.40	\$1.00
White Cape. Heads compact, good size, and of a creamy white	.40	1.00

BRUSSELS SPROUTS

(Sprossen Kohl)

One ounce will produce 2000 plants.

Cultivated for the small heads that grow from the main stem; these small heads are firm and compact like little cabbages, and are considered a great delicacy by many people. Cultivate the same as cabbage or cauliflower.

Long Island Improved. Very compact heads; productive.	.05	.20	.60

CABBAGE (Kopfkohl)

One ounce produces about 3000 plants.

For early use a sowing may be made in the hotbed in February or March; and for winter use seed should be sown in the open ground in May or June. When the plants are five or six inches in height, transplant into rows three to three and one-half feet apart, setting the plants from two to three feet apart in the rows, according to the variety. A deep rich loamy soil is best adapted to the growth of this crop, and if large fine heads are expected, the land must be prepared by very heavy manuring. A handful of wood ashes thrown into the forming heads will not only keep off the cabbage-fly, but will assist the growth of the plants to a considerable extent. Slug Shot is equally effective.

Cappage Plants. See page 24.			

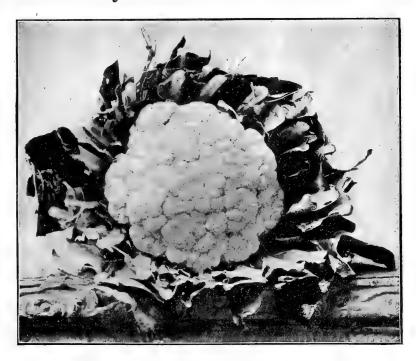

CARROT (Moehre)

One ounce will sow 100 feet of drill; three pounds required for one acre.

The carrot flourishes best in a good, light, well-enriched loam. Where there is a choice of situations, heavy and wet soils should be avoided, and preference given to the light and dry. For an early crop sow as soon as the ground is in good working condition; plantings for general crop may be made as late as June, but early sowings succeed best. The early, small-sized varieties may be sown in drills ten inches apart, but the larger sorts require at least eighteen inches between the rows; cover about one-half inch deep, and when the plants are well up, thin to three to four inches apart. As a conjustive larger than the cover is a very supersed for feeding stock. thin to three to four inches apart. As an agricultural root, the carrot is unsurpassed for feeding stock.

We furnish packets of all varieties of carrots at five cents each postpaid.			
•	Oz.	¼Lb.	Lb.

short, very heavy at the shoulder, of uniform shape and smooth.	.10	.30	1.00

CAULIFLOWER (Blumen Kohl)

One ounce will produce 3000 plants.

The cauliflower, like the cabbage, requires a deep, rich soil, and seldom succeeds well when grown on land long under cultivation. Sow the seed in the hotbed in March, and transplant into the garden in May; set the plants in rows and cultivate the same as cabbage. If the season is dry, water often, as cauliflowers cannot be grown to perfection without plenty of moisture.

Farly Snowball Grev's Selected. A favorite variety, very sure to head. This strain has	Pkt.	Oz.	$\frac{1}{4}$ Lb.

CHERVIL (Kerbel)

Curled Chervil. Cultivate like Parsley. The young leaves are used for flavoring soups and salads; and are also used for garnishing. Pkt. 5 cts.; oz. 20 cts.; ¼lb. 60 cts.

CHICORY See Endive, page 11.

Large-Rooted Magdeburg. Roots when dried and roasted are used as a substitute for coffee. Pkt. 5 cts.; oz. 20 cts.; 4lb. 60 cts.

witloof, or French Endive. Plant in May or June in drills. Thin to six inches apart. Early in the fall the roots should be removed, the tops cut off to within an inch and a half of the neck, the roots made a uniform length of eight or ten inches. They should then be planted in trenches somewhat below the level of the ground. Trenches should be filled with light soil or if a quick growth is desired should be covered with horse manure several inches deep. In about four weeks the leaves will be ready for use. Pkt. 5 cts.; oz. 10 cts.; ½lb. 30 cts.

CELERY (Seleri)

One ounce will produce about 4000 plants.

Sow the seeds in March or April in a hotbed or cold frame. As soon as the plants are three inches high, transplant into a prepared border, setting them four inches apart. When grown six inches, and fine stocky plants, set in richly-manured, deep soil, in rows three and a half feet apart, and about nine inches from plant to plant. Water, if dry weather follows transplanting. During the next two months all the attention required is to keep down weeds. Afterwards earth up a little, and continue doing so at intervals until only the tops of the leaves are visible late in autumn. Never hoe or earth up when the plants are wet.

	Pkt.	Oz.	1/4Lb.
Boston Market. The finest-flavored variety in cultivation; solid, crisp, and of excellent, nutty flavor; dwarf, branching habit; blanches perfectly white; a splendid keeper	\$0.10	\$0.60	\$2.00

White Plume. Very ornamental; the stalks and portions of the leaves are naturally white,	.10	.25	.60

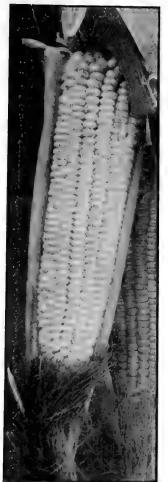

CRESS, or PEPPERGRASS (Kresse)

One ounce will sow 100 feet of drill.

A popular salad, which should be sown early in spring—very thickly in shallow drills—and at short intervals, for succession, as it soon runs to seed.

Extra Curled. The best variety grown; leaves are beautifully cut and curled; highly prized for garnishing. Pkt. 5 cts.; oz. 10 cts.; 4lb. 25 cts.

Water. This wholesome salad may be grown in any moist situation, but more successfully by the edge of a running brook. The seed may be sown in May, on the ground where it is intended to be grown and the thinnings transplanted. The plants should be set not less than a foot apart. The cress will be fit for gathering the second year. Pkt. 10 cts.; oz. 40 cts.

CORN, SWEET, or SUGAR (Welschkorn)

One quart will plant 200 hills; ten quarts will plant one acre in hills.

We furnish 10-cent packets of all varieties of Sweet Corn free of postage by mail. For other quantities add postage at rate of 15 cents per quart if to go by mail.

Corn requires a mellow, loamy, well-pulverized soil, and frequent hoeings. Plant in hills three feet apart each way, dropping five or six kernels in each hill, or plant in rows three to four feet apart, and thin the plants out to eight or nine inches in the row. From the beginning of May until the middle of July successive planting can be made every two or three weeks, and by properly selecting the varieties a continued supply can be had until frost kills the plants.

CORN SALAD or FETTICUS (Ackersalat)

One ounce will sow 100 feet of drill.

This excellent salad may be had the year round. Sow in September, in drills eight inches apart, covering the seeds lightly and protect from frost by a light covering of hay or litter. The seed may also be sown in spring. Large-Seeded. The most popular variety grown. Pkt. 5 cts.; oz. 10 cts.; 1b. 30 cts.

CUCUMBER (Gurke)

One ounce will plant about 50 hills. One and one-half pounds to one acre.

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants, as they can be readily lifted from the hotbed to the garden without disturbing the young plants growing upon them. For main crop, plant in hills four feet apart, in the end of May. Make the hills rich with well-rotted manure, and keep the young plants safe from the striped bug by dusting with dry plaster, or powdered hellebore. Leave four strong plants to each hill.

Arlington White Spine. One of the finest cucumbers for forcing and one of the most perfect Pkt. Oz. 1/4Lb. Boston Pickling. ENGLISH FRAME VARIETIES

The following are excellent varieties for growing in forcing houses: **Duke of Edinburgh, Rollison's Telegraph, The Rochford.** Each per packet 50 cents.

DANDELION (Lowenzahn)

One ounce will sow 200 feet of drill; one pound will sow an acre.

Extensively used as early spring greens, and considered very healthful. Sow seed in May or June, in any good soil, in drills fifteen inches apart, upon beds made smooth with the rake. Cover very lightly and press the earth firmly upon the seed. Cultivate during the summer to keep down the weeds. Cover with litter upon the approach of severe weather, and remove the covering early in spring. If spare frames are at hand, they may be used to advantage by setting them over a portion of the bed, and forcing the dandelions under them, thus forwarding a portion of the crop. Dandelions make an excellent salad if blanched by earthing up, or placing boards to exclude the light.

American Improved. A stocky, thick leaf, hardy variety, grown largely for the Boston market; the best for

general use. Pkt. 10 cts; oz. 50 cts.; 11b. \$1.50.

EGGPLANT (Eirpflange)

One ounce will produce 1000 plants.

Sow in hotbeds very early in spring, and transplant when two inches high into a second bed or into small pots. If that is not done, thin to four inches apart. Do not plant out till the weather becomes perfectly settled and warm. Cool nights or wet weather will check them. Keep some back in frames for a second planting, in case of weather changing unexpectedly. Keep plants watered for a few days if the sun is hot when put out. Set out plants three feet by two.

Black Beauty. Very early and as large as New York Improved. Rich purplish		
black color	\$0.10	\$0.40

New York Improved. A leading market variety; fruit large, oval, very productiv	e .10	.40

ENDIVE (Chicory)

(Endivien)

One ounce will sow 150 feet of drill.

A rather moist soil is preferred. Sow early in the spring in drills twelve inches apart, and thin out the plants to ten inches apart in the drill as soon as they are large enough to handle. Before using, the plants must be

blanched, which is accomplished by gathering the leaves to a point at the top and tying them together with matting or any soft material. It makes a most delicious salad.

		Oz.	$\frac{1}{4}$ Lb.
Broad-Leaved Batavian. Leaves very broad; color light green, requires to be tied up for			
blanching: used principally in soups	\$0.05	\$0.20	\$0.60

Moss Curled. Beautifully curled, and when well developed resembles a tuft of moss; the most			
ornamental of all.	.05	.20	.60
Witloof. See Chicory, page 7.			

KALE, or BORECOLE (Blatter Kohl)

One ounce will produce 1500 plants.

Of all the cabbage tribe this is the most tender and delicate. Early plants may be started in the hotbed, or the seeds may be sown in the open ground in April or May; transplant in June, into rows, and cultivate the same as cabbage. Sea Kale should be blanched either under large pots or by banking up with sand.

			Lb.
Dwarf Green Curled. One of the best; very hardy and improved by a moderate frost	. \$0.05	\$0.10	\$0.75
Large-Seeded Spring. Used only for early greens, and should be sown in rows eighteen	n		
inches apart, as early as the ground can be worked	05	.10	.30
Sea Kale	.05	.30	1.00
Winter, or German Greens (Sprouts). Sow in August or early in September in rows one foot apart and cultivate like Spinach. A very hardy variety	е		

KOHL-RABI

One ounce will sow 200 feet of drill.

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows eighteen inches apart, and the plants thinned out to eight or ten inches.

Purple Vienna. Similar to the preceding, except in color, which is of a bluish purple. Pkt. 5 cts.; oz. 25 cts.; lb. \$2.00.

White Vienna. The earliest and best table or market variety. Pkt. 5 cts.; oz. 25 cts.; lb. \$2.00.

LETTUCE

(Lattich Salat)

One ounce will produce about 3000 plants.

Lettuce succeeds best in rich and comparatively moist soil, and is most crisp and tender if grown in cool, moist weather. The more rapidly the plants are grown, the more tender and brittle will be their quality. For early use, sow under glass in February or March, and transplant into a previously prepared hotbed; rows at least twelve inches apart, according to the varieties. Sowings may be made in the open ground as soon as all danger from frost is over; and if a continuous supply is desired during the season, make sowings every two or three weeks, until September.

LEEK (Lauch)

One ounce will sow 100 feet of drill.

The Leek is very hardy, and easily cultivated; it succeeds best in a light, but well-enriched soil. Sow as early in spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high, transplant in rows ten inches apart each way, setting them deep, that the neck, being covered, may be blanched.

Carentan, or Musselburgh. A very large variety of superior quality. Pkt. 5 cts.; oz. 20 cts.; \(\frac{1}{4}\)lb. 60 cts.

Large Flag Winter. Desirable for market or family use. Pkt. 5 cts.; oz. 20 cts.; 11b. 60 cts.

MARTYNIA (Gemsenhorn)

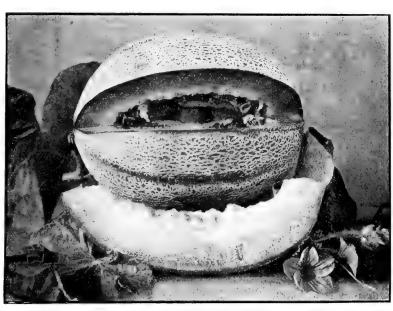

One ounce will plant 100 hills.

MUSK MELON

(Melone)

One ounce will plant 60 hills, two to three pounds for an acre.

Cultivate in hills, which should be five to six feet apart each way, and composed of light, moderately rich soil. The hills should be dug about two feet square, eighteen inches deep, and half filled with well-rotted manure, which must be thoroughly incorporated with the soil. Plant in May, six to eight seeds to the hill, and when the plants are well up, thin out to three. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting.

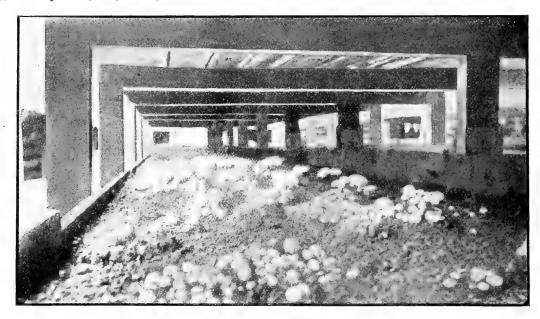

GREEN AND YELLOW-FLESHED VARIETIES	Pkt.	Oz.	1/4 Lb.
Arlington Nutmeg. Skin deep green, finely netted, flesh greenish-yellow; rich and sugary	\$0.05	\$0.15	\$0.50

ductive: quality excellent	.05	.10	.25
Vick's Early. Very early, oblong, medium size, with bright pink flesh, solid and sweet	.05	.10	.25

MUSHROOM (Champignon)

One pound of spawn is sufficient for nine square feet of bed.

Mushrooms are more easily cultivated than many people imagine, and may be grown in any dark room or cellar where the temperature can be maintained at from fifty to sixty-five degrees. For the bed, use a mixture of horse manure and good fresh loam in equal proportions. Before being placed in the bed let this material be thoroughly mixed, and well turned three or four times to sweeten in some dry place. Upon a dry, firm bottom, proceed to make the bed, by spreading a thin layer of the prepared mixture and pound it firm till the bed is eight inches thick. Leave it thus for about a week, or till the temperature of the bed has subsided to ninety or ninety-five degrees. Then make holes about ten inches apart, and put in each a piece of spawn about the size of an egg. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition ten days. Then cover with two inches of fresh loam. Over this place a few inches of straw. If the temperature is right, mushrooms will appear in six to eight weeks from time of spawning. The bed will continue bearing about a month. After the first crop is gathered, spread over the bed an inch of fresh loam, and moisten with warm water. In the event of the surface of the bed getting very dry at any time, it should be moistened freely with water at a temperature of eighty to eighty-five degrees.

If wanted by mail, add 10 cents per pound for postage.

American Pure Culture. Single bricks 25 cts. each. \$15.00 per 100.

English Mushroom Spawn. Made by the best maker in England especially for our trade. Lb. 12 cts.; 50 lbs. \$5.00: 100 lbs \$9.00.

THOMAS J. GREY CO.'S SEED CATALOGUE

MUSTARD (Senf)

One ounce will sow 50 feet of drill.

Green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

Chinese Broad-Leaved. Leaves much larger than the white mustard; flavor pleasantly sweet and pungent.

Can be cooked like spinach. Pkt. 5 cts.; oz. 10 cts.; 1lb. 25 cts.; lb. 60 cts.

Fordhook Fancy. Very ornamental. Plants of vigorous growth; cook same as spinach. Pkt. 5 cts.; oz. 15 cts.; 4lb. 25 cts.; lb. 75 cts.

White. Much used for salads; the seed is also used medicinally, and as a seasoning for pickles. Pkt. 5 cts.; 4lb.

10 cts.; lb. 30 cts.

OKRA or GUMBO (Essbarren)

One ounce will sow 40 feet of drill.

This plant is extensively cultivated for its green pods, which are used in soups and stews, and are very wholesome and nutritious. Sow about the middle of May, in drills three feet apart, and thin out the plants to one foot apart.

White Velvet, or Creole.	Pods smooth, of large size, and a creamy white	.05	.10	.30	

ONION (Zwiebel)

One ounce will sow 100 feet of drill. Four or five pounds to the acre.

The onion thrives best in a light, loamy, mellow, soil; and unlike most kinds of garden vegetables, succeeds well when cultivated on the same land for successive years. The seed should be sown as early in the spring as the ground is in good working condition, in drills fourteen inches apart, and covered one-quarter of an inch deep. Unless the plants stand very thick they need not be thinned out much, as they will crowd each other and find room to grow. Keep free from weeds, but be careful not to disturb the growing bulbs. A top dressing of wood ashes, applied after the second weeding, is very beneficial to this crop, as will soon be observed by the dark and healthy change of color given to the plants. The onions will ripen early in September, and after being gathered and exposed to the sun a few days for drying they will be ready for storing or the market.

sets; not quite as mild flavored	.25	1.25

PARSLEY (Petersilie)

One ounce will sow 150 feet of drill.

Parsley succeeds best in rich, mellow soil, and as the seed germinates slowly—sometimes remaining in the earth four or five weeks before the plants appear—the sowing should be made as early in spring as the ground is in working condition. Can also be sown in hotbed in February. When the plants are two or three inches high, thin them out to eight or ten inches apart. The leaves of the curled varieties are used for garnishing, also for flavoring soups and stews.

THOMAS J. GREY CO.'S SEED CATALOGUE

PARSNIP (Pastinake)

One ounce will sow 100 feet of drill. Five to six pounds to the acre.

Sow in April or early in May, as parsnips require a long season to mature. Their cultivation is otherwise the same as directed for carrots. They may be dug in the autumn and stored for winter use, but if left in the ground till the following spring they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

Arlington Long White. A good variety for general use; long and smooth. \$0.05 \$0.10 1.60 Early Round. The earliest variety in cultivation, of good flavor but of small size. 0.5 .10 .60 Hollow-Crowned. Roots very long, white, smooth and sweet. Excellent flavor. 0.5 .10 .60

PEAS (Erbse)

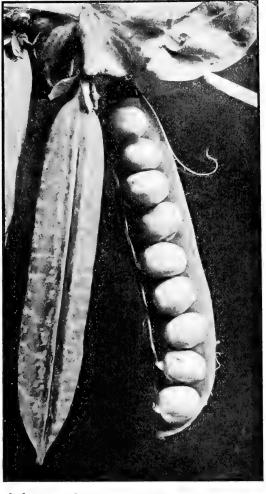

One quart will sow 100 feet of drill. One and onehalf bushels per acre.

Peas succeed best in light, rich soil; the dwarf varieties require liberal manuring, the tall varieties requiring less; they also succeed best under a low temperature. The early, round, smooth varieties should be planted as early in spring as possible, while the wrinkled sorts, which are more tender, will do better if planted after the ground becomes warmer. Sow in drills, two or three feet apart, according to variety, and cover early sowings about two inches; later plantings should be covered three to four inches. Make the drills deep enough to allow room for the manure, which should be scattered along the bottom of the drill and then covered thinly with soil before sowing the peas so that they will not come in contact with it. Successive plantings can be made every ten days up to the middle of July. For the later plantings the early varieties are preferred.

If ordered to go by mail, add 15 cents per quart to cover postage. We furnish 10-cent packages of all kinds of peas, except where noted, free of postage.

POTATOES (Kartoffel)

Eight to ten bushels will plant one acre.

Special quotations on large lots. Prices subject to the changes of the market.

A good, sandy loam produces the best potatoes, but they can be grown on all kinds of soil. New or pasture land, with the turf freshly turned, produces the finest crop. Make furrows of good depth, three feet apart. Scatter a liberal dressing of phosphate or decayed stable manure along the drill, and set the seed about ten inches apart in the rows. Cover with about two inches of soil, and begin to cultivate when the plants are well up. At each successive hoeing, bring additional soil about the plants.

The necessity of changing potato seed is universally admitted by all well-posted growers. By using our

Northern Grown Seed you are assured of early maturity, increased yield and a vigorous growth.

PUMPKIN (Curbis)

One ounce will plant 20 hills. One pound 250 hills.

Sow in good soil in May, when the ground has become warm, in hills eight or ten feet apart each way; or in fields of corn, about every fourth hill. The pumpkin is not so particular in regard to soil as the melon or cucumber, but in other respects is cultivated in a similar manner. If planted in hills by themselves, thin out the plants when beginning to run, to three in each hill.

RADISH (Rettig)

One ounce will sow 100 feet of drill.

For very early use seeds can be sown in frames in February, making successive sowings every two or three weeks. Sow also in the open ground the last of April in light, rich, sandy soil, selecting a warm or sheltered location. Later sowings can be made at intervals during the summer in a moist location where they can grow quickly. Sow broadcast or in drills. Seeds of Winter Radishes should be sown during mid-summer, and the radishes can be kept during winter if covered with sand and placed in a cool cellar.

RHUBARB (Rhabarber)

One ounce will produce about 750 plants.

Rhubarb succeeds best in deep, rich loam; the richer its condition, and the deeper it is stirred, the better, as it is scarcely possible to cultivate too deeply or to manure too highly. It is propagated by seeds, or by division of the roots— the latter being the usual method. Sow the seed in drills eighteen inches apart, and thin out the plants to nine inches apart in the drills. When the plants are one year old transplant into beds, setting the plants five feet apart each way. Do not cut until the second year and give a liberal dressing of manure every fall.

SALSIFY or VEGETABLE OYSTER (Haferwurzel)

One ounce will sow 50 feet of drill.

A very delicate and nutritious vegetable, especially esteemed for its peculiar oyster flavor. Sow the seed early in spring, in drills twelve inches apart and one inch deep, thinning out the young plants to six inches. The roots will be ready for use in October, when a supply should be taken up and stored like carrots. Those remaining will suffer no injury by being left in the ground till spring.

SPINACH (Spinat)

One ounce will sow 50 feet of drill. Twelve pounds will sow an acre.

Spinach may be grown on any ordinary soil. It is grown both as a spring and summer crop. For early use, sow in August or September, in drills twelve to fourteen inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in spring. For summer use, sow early in spring, in same way as above, using rather less seed. If the plants stand too thick, thin to three or four inches apart. A liberal dressing of good manure should be used. The land can hardly be made too rich.

SQUASH (Speise Kurbiss)

One ounce of the small seeded variety will plant 40 hills; of large seeded, 15 hills. Squashes being very tender and sensitive to cold should not be planted until the weather becomes warm and settled. Plant in well-manured hills, in the same manner as cucumbers and melons, the bush varieties three or four feet apart each way, and the running kinds from six to eight feet apart. Sow eight or ten seeds to a hill, thinning out, after they have attained their rough leaves, and danger from bugs is past, leaving two or three of the strongest plants in each hill.

TURNIP (Rube)

One ounce will sow 150 feet of drill. One and one-half pounds per acre.

Turnips do best in highly enriched, light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. Seed can also be sown broadcast using one pound to the acre. For a continuous supply through the season sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for fall and winter use. Swedish or ruta-baga turnips are largely grown for a farm crop, as well as for the table; make sowings from the tenth of June until the last of July, in drills two to three feet apart, and the plants when well up should be thinned to from eight to ten inches apart. They are best preserved in a pit or cellar during the winter, and are excellent for the table early in spring.

are excellent for the table early in spring.	Pkt.	Oz.	¼Lb.	Lb.

Spring. Saskatchewan	2.50
Winter. Klondyke bald, white grain	2.50

MILLETS

Prices subject to change with the market.

Valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock; should be sown in June and July. They must be cut while in blossom to make good hay.

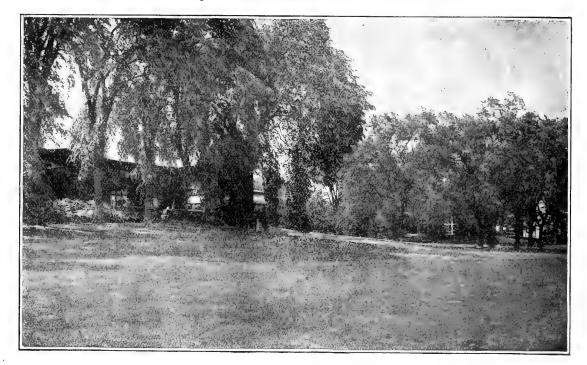

German, or Golden. A valuable annual hay and fodder crop, more productive and coarser than the Hungarian; medium early, four to five feet high. Sow one bushel to the acre. Bushel, \$2.50.

Common Millet (Panicum Millaceum). Very early, two to three feet high, foliage broad, heads open, branching panicles. Bushel, \$2.25.

Japanese (Panicum crus Galli). Grows taller and stools out more freely than the Common Millet; very productive. If sown early and cut, usually produces a good second crop. It has produced in Massachusetts six tons dry hay per acre; highly recommended. Sow twenty pounds per acre. Lb. 10 cts.; bushel \$2.75.

Hungarian Millet (Panicum Germanicum). An annual forage plant, early and productive, growing two to three

Hungarian Millet (PANICUM GERMANICUM). An annual forage plant, early and productive, growing two to three feet high with an abundance of foliage, often yielding two to three tons per acre. Sow one bushel to the acre. Bushel, \$2.00.

LAWNS

The following simple directions may be found useful to those who are not familiar with lawn making. The soil should be of good depth, moderately rich and in many the land should be carefully drained. Grading should be done and the soil thoroughly pulverized by careful harrowing and raking. Some good fertilizer—pure ground bone, wood ashes or a specially prepared lawn fertilizer should be used. After spreading the fertilizer the surface should be carefully raked and rolled. The rolling often develops uneven spots which should be levelled before the seed is sown. After sowing, the ground should again be lightly raked and rolled.

The selection of seed is important. Use only such mixtures as are free from weed seeds, and such as will

The selection of seed is important. Use only such mixtures as are free from weed seeds, and such as will produce a firm, strong turf and a fine growth. A liberal quantity is necessary to secure good results (not less than 60 pounds per acre). The best time to make a lawn is from the middle of August through September. If seed is sown at this season the grass will become strong enough to withstand the winter, and a good lawn is assured the following season. If seed cannot be sown at this time it should be sown as early as possible in the spring.

Boston Lawn Grass Seed. This mixture is composed of such varieties as long experience has shown to be adapted to produce a permanent heavy turf. Weighs 16 pounds per bushel. Quart 25 cts.; 4 quarts 85 cts.; peck \$1.50; bushel \$4.50.

Grey's Special Recleaned Lawn Grass Seed. Recleaned seeds only are used in this mixture, and it is as free from weed seeds and chaff as the latest improved seed cleaning machinery can make it, and it is composed of such varieties as make a close and lasting turf. In recommending this grade to our customers we are sure we are recommending a mixture which cannot be excelled for general lawn purposes. Weight 32 pounds per bushel. Sow 60 pounds per acre. Per 1/2 pound 20 cts.; per pound 35 cts.; 5 pounds \$1.70; 10 pounds \$3.25; 100 pounds \$30.00.

SPECIAL MIXTURES FOR TENNIS-COURTS, GOLF-LINKS AND SHADED LAWNS.

The following mixtures have been used on many prominent golf-courses, etc., in this vicinity, and have given entire satisfaction:

Fair Green Mixtures. For general use on golf-links. Per 1/4 bushel \$1.50; per bushel \$5.00.

Putting Green Mixture. A combination of grasses best suited to produce a close, firm and lasting turf, which will endure frequent cutting. Per quart 30 cts.; per 1/4 bushel \$1.75; per 1/3 bushel \$3.25; bushel \$6.50.

Mixture for Shaded Lawns. Fine grasses selected especially for locations partially shaded by buildings or trees. Per bushel of 24 lbs. Per pint 20 cts.; per quart 35 cts.; 4 quarts \$1.25; ½-bushel \$2.25; bushel \$8.00.

Tennis-Court Mixture. A mixture of fine grasses especially adapted to tennis-courts, which will bear tramping without injury. Per quart 35 cts.; 4 quarts \$1.25; ½ bushel \$2.25; ½ bushel \$4.00; bushel \$8.00.

CHOICE GRASS SEEDS

Many growers of grass seeds offer several grades of each variety, varying greatly in price. We do not recommend nor do we sell the inferior grades. Those which we offer are strictly High Grade, and the prices at which we offer them should not be compared with those quoted for inferior grades.

Prices may change as the season advances. If to go by mail add eight cents per pound to cover postage.

Awnless Brome Grass (Bromus Inermis). Recommended for dry, and soils where other grasses do not grow. In nutritive value is much inferior to many other sorts, but is very permanent and therefore useful for some

locations. Per pound 20 cts.; 100 lbs. \$18.00.

Beach Grass (Ammophila Arundinacea). Valuable for sowing on railway banks, seashore, etc. Its strong, creeping roots hold the drifting sands, and protect against wind and wave. This grass is usually propagated by transplanting in the fall. When seed is used it should be sown in the spring, and covered with brush until the seed becomes established. Per lb. 70 cts.; per 100 lbs. \$60.00.

Creeping Bent (Agrostis Stolonifera). One of the most valuable lawn grasses because of its short growth and deep-green, fine-leaved foliage. Its stoloniferous roots form a strong, close, enduring turf which is not injured by being frequently walked on. Per lb. 45 cts.; per 100 lbs. \$40.00.

Crested Dogstail (CYNOSURUS CRISTATUS). Good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns; thirty-five pounds to the acre. Per lb. 45 cts.; per 100 lbs. \$50.00.

Hard Fescue (Festuca duriuscula). Admirable pasture grass of fine quality; thrives well in dry situations;

thirty pounds to the acre. Per lb. 35 cts.; per 100 lbs. \$30.00.

Hungarian Grass. See page 25.
Italian Rye Grass (LOLIUM ITALICUM). Thrives in any soil, yields an early and abundant crop, valuable for

mixing with other pasture grasses; sow fifty pounds per acre. Per lb. 15 cts.; per 100 lbs. \$12.00

Kentucky Blue (Poa pratensis). Also called "June Grass;" an early grass of much value; will do well upon any ordinary soil; stands the heat of summer remarkably well. For pastures and lawns it has no superior, giving that peculiar, rich shade of bluish-green so much admired in the best lawns; also making a very close, velvety turf. It is usually sown mixed with other fine grasses; when used alone, 30 to 40 pounds per acre. Blossoms in June. Fancy clean seed. Per lb. 35 cts.; per 100 lbs. \$30.00.

Lime Grass (Elymus Arenarius). Has wide-spreading, thickly-matted roots which tend to hold drifting sands. Valuable for seashore and embankments. Per lb. 60 cts.; per 100 lbs. \$50.00

Meadow Fescue (FESTUCA PRATENSIS). This is excellent for hay when sown with other grasses, such as Orchard grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils; sow forty pounds per acre. Per lb. 45 cts.; per 100 lbs. \$40.00.

Meadow Foxtail (Alopecurus Pratensis). One of the best and earliest of pasture grasses; thrives best in moist

localities; thirty pounds to the acre. Per lb. 40 cts.; per 100 lbs. \$35.00.

Millet. See page 25.

Orchard (DACTYLIS GLOMERATA). One of the earliest grasses; yields immense crops and is excellent for pasture or hay; should be cut as it is coming into bloom, and will produce a heavy second crop; one of the best grasses.

Sow forty pounds per acre. Per lb. 30 cts.; per 100 lbs. \$28.00.

Perennial Rye Grass (LOLIUM PERENNE). A valuable grass for pastures or meadows, also very valuable where mixed with other grasses for lawns, golf-links, etc. The seed is large and heavy, and produces a good growth in five or six weeks. It is also well suited to a variety of soils, and makes excellent hay when grown with red clover. We offer an extra choice lot of seed. Per lb. 15 cts.; per 100 lbs. \$12.00.

Red Top (Agrostis vulgaris). A valuable native permanent grass, growing in almost any soil, moist or dry, but pays well for high cultivation; fourteen to sixteen pounds per bushel. Sow forty pounds per acre, if alone.

Per lb. 18 cts.; per 100 lbs. \$14.00.

Red Top Fancy. Clean seed. Absolutely clean and free from chaff; thirty-six pounds per bushel. Per lb. 30 cts.; per 100 lbs. \$28.00.

Red, or Creeping Fescue (Festuca Rubra). A creeping rooted grass forming a close and lasting turf. Is especially adapted to dry and sandy soils, resists extreme drought, and is useful for gravelly banks and exposed hillsides. It is also valuable for shaded locations. Per lb. 35 cts.; per 100 lbs. \$30.00.

Rhode Island Bent (Agrostis canina). Resembles Red Top, but is of dwarfer habit. A fine, hardy, very compact grass; very permanent, readily forming a heavy sward; excellent for lawns. Sow four bushels per

acre, if alone; (ten pounds per bushel). Per lb. 45 cts.; per 100 lbs. \$40.00.

Rough Stalked Meadow Grass (Pon Trivialis). A thickly-matted, spreading rooted species, forming a firm fine turf, especially adapted to the shaded parts of lawns. It thrives on moist, rich soils and in sheltered situations. Valuable for permanent pastures. Twenty-six pounds per bushel. Per lb. 45 cts.; per 100 lbs. \$40.00.

Sheep Fescue (Festuca Ovina). In grass mixtures for high or dry land this is especially valuable, as it thrives on poor, light or gravelly soils. It is very hardy, resisting heat and cold, and is useful in mixtures for fair

greens; (sixteen pounds per bushel). Per lb. 35 cts.; per 100 lbs. \$30.00.

Slender Fescue (Festuca Tenuifolia). A variety of Sheep Fescue, but with finer leaves. It will grow on dry, poor soils, and is useful in mixtures for dry banks and slopes; (twenty-two pounds per bushel). Per lb. 50 cts.; per 100 lbs. \$45.00.

Sweet Vernal, True Perennial (Anthoxanthum odoratum). Useful to mix with other grasses for lawns, in which it is invaluable on account of its early growth and the fragrant odor which it imparts when drying; very hardy and permanent. Per lb. 80 cts.; per 100 lbs. \$70.00.

CHOICE GRASS SEEDS, continued

Tall Fescue (FESTUCA ELATIOR). Succeeds best on moist, alluvial and strong clayer soils. Is especially valuable for permanent pastures. Stock of all kinds are fond of it, and it is rich in nutritive value; (twenty-two pounds per bushel). Per lb. 45 cts.; per 100 lbs. \$42.00.

Tall Meadow Oat Grass (AVENA ELATIOR). This grass produces an abundant supply of foliage, and is valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick growth of aftermath, which also makes it valuable as a soiling crop; (thirteen pounds per bushel).

Per lb. 35 cts.; per 100 lbs. \$30.00.

Timothy, "Herd's Grass" (Phleum Pratense). One of the most valuable grasses and more generally used for hay than any other. It prefers a moist, loamy soil, not doing well on light soil. It is generally sown with Red Top and Red Clover, and makes the most valuable hay; (forty-five pounds per bushel). Present price, per lb. 16 cts.; per bushel \$6.50.

Various Leaved Fescue (FESTUCA HETEROPHYLLA). Very early, hardy perennial thriving best in cool, moist soils. Valuable in grass mixtures for permanent meadows. It is also useful in shady locations; (fifteen pounds per bushel). Per lb. 40 cts.; per 100 lbs. \$35.00.

Wood Meadow (Pon Nemoralis). A variety specially suited for the shaded portions of lawns where other grasses do not grow. Very permanent and hardy, resisting extremes of heat and cold. The creeping roots make a strong, firm sod (eighteen pounds per bushel). Per lb. 80 cts.; per 100 lbs. \$75.00.

MISCELLANEOUS SEEDS

Beans. Soja. A valuable fodder crop, fed green or as ensilage; Early Green. Bushel \$4.50; Yellow Southern. Bushel \$3.50.

Broom Corn. Dwarf improved. Fine brush. Per lb. 25 cts.

Cow Peas. These are grown extensively in warm countries. Sheep are very fond of them, but their chief value is as a green crop to plow under. One and one-half bushel per acre. New Era. One of the best varieties for Northern planting, maturing early and being productive.. \$1.25 4.00Black. Very prolific. 1.25
Whippoorwill. Early. 1.25 4.00 Whippoorwill. Early..... 4.00 Flax Seed. Clean seed. Per lb. 15 cts.; per 100 lbs. \$7.50.

Kaffir Corn. White; excellent for fodder, and the seed is valuable for pigeons. Per lb. 15 cts.

Peas, Canada Field. Valuable when sown with oats as a green fodder. Also makes good ensilage. Sow two bushel oats and one bushel peas per acre. Per bushel \$2.50.

Rape, Dwarf Essex. Excellent for sheep pastures, also for soiling. If sown in May, pasturing can be had in August. Sow ten pounds per acre, broadcast. Per lb. 10 cts.; per 100 lbs. \$8.00.

Sorghum, Early Amber (Sugar Cane). One of the best varieties for Northern latitudes. Per lb. 15 cts.

Sunflower, Mammoth Russian. Used for feeding poultry. Per lb. 10 cts.; per 100 lbs. \$7.00.

Vetches, or Tares, Spring. (Vicia sativa.) A pea-like plant grown to some extent for feeding to stock. Frequently sown with oats. Sow one to one and one-half bushel per acre. Market price.

Vetches, Sand, Winter or Hairy (Vicia villosa). Thrives on poor, arid, sandy soil, and can be sown either

in spring or fall. If cut as soon as full grown and before flowering a second growth will be made. Sow forty to fifty pounds per acre. Per lb. 12c.; \$6.75 per bushel (60 lbs.)

Wild Rice (ZIZANIA AQUATICA). Seed should be planted in the fall, but if this cannot be done, the seed should be kept moist until ready to sow. Per lb. 50 cts.

CLOVER SEEDS Prices subject to change with the market. Add eight cents per pound if wanted by mail. Alfalfa, or Lucerne (MEDICAGO SATIVA). The growing of alfalfa in New England has not been at- Lb. 100 Lbs. tended with much success. In some locations, however, it has proved valuable (where the land and conditions were favorable), and in spite of its tendency to kill out at intervals it is believed to be worthy of trial in well-drained land because of its heavy yield. Seed can be sown in April and May in this latitude, and much later in the South. The land should be deeply ploughed and carefully prepared, twenty to twenty-five pounds of seed per acre are required. Best results are obtained where the seed has been treated with some good nitrogen gathering bacteria. The land should also be carefully limed.

Alsike, or Swedish (Trifolium Hybridum). Hardiest of all the clovers and on rich, moist soil \$0.30 \$28.00 yields an enormous quantity of hay or pasturage. Valuable for sowing with clovers or grasses, 23.00 as it forms a thick bottom and increases yield of hay..... Crimson Clover (TRIFOLIUM INCARNATUM). An annual variety, largely used in the South for feed-

ing green and for hay. The yield in fodder is large, and after cutting, it at once commences growing again and continues until cut by frost. Sow in April or May; twenty pounds to the acre. Not always hardy in New England. Price variable.

Red Clover, Medium (TRIFOLIUM PRATENSE). The leading variety of clover for pastures or mead-20.00 .24 ows. Requires deep, rich soil. Sow in spring...... Red Northern, or Mammoth. Grows four to five feet high, and is used to plow under for manure. 23.00 .25

35.00

.40

White Dutch Clover (TRIFOLIUM REPENS). The best variety for lawns, as it forms a close herbage and remains green throughout the season; valuable when mixed with grass seeds for pasture.

GENERAL LIST OF GREY'S SUPERIOR QUALITY FLOWER SEEDS

Very carefully revised list to which many meritorious and recently introduced sorts have been added and all inferior varieties discarded.

All flower seeds mailed free on receipt of price quoted.

If the number is used when ordering, it will not be necessary to write the name.

ASTERS

These are grown from carefully selected stock seeds, and we can with confidence recommend them of superior quality and cannot be surpassed. For best results they should have a good, rich soil and plenty of moisture. As the roots are produced near the surface, a mulching during hot weather is very beneficial. The location of the bed should be changed every year.

AMERICAN BRANCHING. Superb and free-

flowering strain. The flowers are extremely large, very double with graceful petals and	
on long stems resembling the chrysanthemum. They bloom late in the season. No. One of the best sorts for cutting.	Pkt.

	PANSY. Too much importance cannot be at-	.10
	tached to the culture of these beautiful plants. For early spring blooming the	:
	seed should be sown in July or August and the plants protected during winter. Early	
	spring-sown seed will give fine blooms dur- ing summer and fall. A good cool rich soil	
	is essential. Rotted cow manure is the	
	best fertilizer for them, and one cannot use too much of it. No fertilizer of a heat-	
	ing nature should be used; give plenty of water through dry weather. You cannot	
4100	grow good pansies under trees. Grey's Prize Exhibition Strain. This	
	splendid mixture represents the highest

	PRIMULA Chinensis (Chinese Primrose). All our Chinensis and Stellata primroses are grown for us by an English specialist who grows nothing but Primulas, and our strains of these were among the best ex-	
	hibited for the last two seasons. For excellence in every point they cannot be equalled.	
4745	Grey's Giant White. The largest and best white ever sent out, flowers of great substance.	1.00
4 750	Grey's Giant Pink. The finest and largest bright pink; petals extremely large and of	1.00
4755	great substance	
4760	and very free-flowering	1.00
4765	mon-pink flowers well above the foliage Grey's Giant True Blue. Beautiful fringed blossoms of immense size, fine substance and freely produced; the best blue	1.00
4770	Grey's Orange King. A grand new sort, said to be an entirely new color in Primu- las, a beautiful orange color in bud and when open of a terra-cotta color shaded	1.00
4775	with orange-salmon around the edge; very large and free	1.00
4780	fringed and curved; the color is an art shade of an intense fiery glare	1.00
4785	blooms, forming a pyramid of beautiful rich crimson flowers; superb sort	.75
47 90	with large beautifully fringed crimson scarlet flowers Giant Crimson King. The large deep rich	.75
	crimson bloom with a dark brown eve make it one of the most brilliant and effective	.75

	Primula Chinensis	
No.	Primula Chinensis, continued	Pkt.
4795	Giant Covent Garden White, Improved. Flowers very large white and beautifully fringed; a very free-flowering improved	
4800	strain	\$0.75
4000	soft pink, with very large erect blooms	.75
4805	Giant, His Majesty. Magnificent new sort, with distinct glossy foliage and mas- sive, finely-fringed, velvety, dark crimson	
	blooms; one of the finest ever raised	.75
4810	Giant Queen of White. Very large and	
4815	free-flowering white sort; splendid Giant Ruby Queen. One of the finest of all the deep red sorts, the flowers are large	.75
	finely fringed, and of an intense rich scarlet with bright yellow eye	.75
4820	Giant Royal Blue. Large flowers of a rich dark-blue color, great substance, elegant form and very free-flowering	.75
4825	Giant Duchess. Most distinct and beau- tiful, having large pure white flowers with a zone of carmine crimson around a clear	
48 30	yellow eye	.75
100 #	robust and very free-flowering	.75
4835	Grey's Giant Mixture. A grand mixture of giant primroses	1.00
4840	Half packet of Giant Mixture PRIMULA Stellata or Star Primrose. This	.50
	valuable and very distinct variety should	
	be extensively grown for greenhouse and table decoration. The innumerable star-	
	shaped flowers make an effective contrast	
4845	to the attractive dark foliage. Blue Star Improved. A strain of very	
4040	large dark blue flowers and pale green foli-	
40 # 0	age	.75
4850	Crimson Star. Fine colored sort with large, brilliant, rich crimson flowers	.50
4855	Giant Salmon Pink Star. Flowers of	0
	gigantic size in a beautiful salmon-pink shade; very dark foliage	.75

No.	Primula Stellata, continued	Pkt.
4860	King of Star. Improved deep crimson,	
	with beautiful foliage, distinct	\$0.75
4865	Miss Irene. A very pretty shade of salmon	
	pink with light green foliage	.50
4870	Salmon Pink Star. Greatly improved	
	strain and a charming companion to the	
	following white star	.50
4875	White Star. Improved, large pure-white	
	flowers produced in great abundance, re-	=0
4000	lieved by the dark foliage	.50
4880	Mixed Star. A special mixture of all the	50
	best sorts of Stellata Primulas PRIMULA Obconica. A beautiful and con-	.50
	tinuous blooming variety with handsome	
	spikes of flowers and pretty foliage. For winter blooming seed should be sown in	
	April or May in good porous loam. The	
	grandiflora sorts are the freest blooming,	
	but the individual flowers are not as large	
	as the gigantea type.	
4885	Grandiflora alba. Large pure white	.25
4890	-Carminea. Large carmine red	.25
4895	-Rosea. Large clear rose-pink	.25
4900	-Rubra. Large dark red	.25
4905	-Hybrida. Finest large-flowered sorts,	
	mixed	.25
4910	mixed —Fimbriata. Large fringed flowers of	
	choicest colors	.25
4915	Giant Bright Rose	.50
4920	-Lilac	.50
4925	-Rich Crimson	.50
4930	Forbesii (Baby Primrose). This is like the	
	Obconica in habit with showy rosy-lilac,	
	yellow-eyed flowers, a continuous bloomer	
	and may be had in flower in 3 months after	0.5
4025	PRIMULA Kewensis. A great acquisition	.25
4930	as a winter-flowering decorative plant and	
	excellent for cutting. The flowers are	
	bright yellow, very fragrant on erect stems	
	12 to 18 inches long	.50
	PYRETHRUM. Handsome hardy peren-	.50
	nials, indispensable for herbaceous borders	
	or for cutting; they grow best in cool, moist	
	situations. 2 ft.

1	of Comment of the Marine Marine 14	. 1

Gentlemen: — The Grey's Orange Prince and Grey's Lemon Queen, African Marigolds, seed of which was obtained from your house, are by far the finest type I have grown, covering a period of many years in growing flowers. The large perfectly developed flowers will prove a delight to admirers of their old favorite. Both amateurs and professional florists who wish something choice for exhibition purposes should include this superb annual in their collection the coming season.

H. N. Smith,

Grower of Choice Garden and Flower Seed Specialties.

MIXED FLOWER SEEDS FOR WILD GARDENS

"Wild Gardens" have proved a marked success; and we are in receipt of the most satisfactory evidence of the estimation in which they are held. Any one who has cultivated flowers knows the constant attention necessary in the care of well-laid-out beds and borders. To those who cannot give this care, the "Wild Garden" presents a substitute which, for its unusual and varied effects, cheapness, and the small amount of labor necessary for its construction, has no rival. "Wild Garden" seeds are a mixture of over one hundred varieties of flower seeds, and, being mixed together, can be offered at a much less price than when sold in separate packets. The different seasons of bloom insuring something new almost every day.

GREY'S COLLECTION OF FLOWER SEED

In response to the numerous inquiries, "What can I plant at my summer home that will give me a good display through the season and flowers to cut for the house," we have made up the following collection which has given great satisfaction to our customers. The quantity is sufficient for a large garden and price \$1, postpaid.

lb sweet peas, Columbia mixture; 1 oz. tall nasturtiums, special mixture; ½oz. wild garden mixture, and a packet of each of the following: Sweet alyssum, asters, bachelor's buttons, chrysanthemum, clarkia, coreopsis, Chinese pinks, eschscholtzia, gaillardia, godetia, miniature sunflower, Bar Harbor marshmallows, lupins, marigold, mignonette, nicotiana, Shirley poppy, scabiosa, zinnia.

ORNAMENTAL GRASSES

For borders and ornamental gardening; also, when dried, for winter bouquets and decorations, for which purpose they should be gathered before fully matured.

BAY TREES AND BOXWOOD TREES

STANDARD BAY TREES

Crowns	I I	
20 to 22 in. diam		6.50
36 to 38 in. diam		5.00

PYRAMIDAL BAY TREES

Height	Diameter of Base	Each
4 feet	18 in.	\$6.50
5 feet	24 in.	10.00
6 feet	24 in.	13.50
7 feet	30 in.	18.00
7 to 8 feet	36 in.	22,50
8 to 9 feet	36 in.	30.00

BOXWOOD TREES (Buxus Arborea)

These are trained in the form of pyramidal bay trees and are used for similar purposes. They have been found to survive the winter out of doors on the Massachusetts coast, with slight protection.

Pyra midal. 3 to 3½ ft., each, \$3.50; 3½ to 4 ft., each, \$4; 4 to 5 ft., \$5 to \$6.

Standards. 15-inch diam., each, \$2.50; 18-inch diam., each, \$3.50.

If box trees are wanted in heavy green painted tubs, add \$1.50 per each plant.

NOTICE. The measurements of the foregoing trees are approximately correct; slight variations are unavoidable.

PALMS, FERNS AND DECORATIVE PLANTS

Unless otherwise directed we ship all this class of plants by express as we consider it much more safe, and the principal express companies charge 20 per cent less than their regular merchandise rates on plants packed in covered boxes or crates.

AURACARIA Excelsa (Norfolk Island Pine). A rich fine foliage conifer with successive tiers of branches; excellent for house or conservatory 5-in. pot, 3 tiers, 75 cts. each; 6-in. pot, 4 to 5 tiers, \$1.25 to \$1.50 each; 7-in. pot, 5 to 6 tiers, \$2 to \$2.50 each.

ARALIA. Handsome foliage plants for conservatory decoration.

Elegantissima. \$1.25 and \$1.50 each.

Veitchi. Dark green narrow leaflets, red underneath. \$1.25 and \$2 each.

Veitchi Gracillima. Very graceful foliage. \$1.25 and

ASPARAGUS Plumosus Nanus (Asparagus Fern). Bright green, delicate foliage. 15 and 25 cts. each; \$1.50 and \$2.50 per doz.

Sprengeri. Excellent for the window box, hanging baskets and for cutting. 15 and 25 cts. each; \$1.50

and \$2.50 per doz.

ASPEDISTRA. A decorative plant well suited for shady nooks and places away from the light, will succeed where other plants fail.

Lurida. Long green leaves. 6-in. pots, \$1.25 to \$1.75

each; 7-in. pots, \$1.50 to \$2 each. Lurida Variegata. Green and white striped foliage.

AUCUBA Japonica. Green and white striped foliage. 6-in. pots, \$1.50 to \$2 each; 7-in. pots, \$2 to \$3 each.

AUCUBA Japonica. Rich glossy foliage thickly spotted with yellow; excellent for house and veranda decoration. Bushy plants pot-grown. 75 cts. to \$1.50 each; large plants \$2 to \$3 each

BEGONIA Rex. Beautiful ornamental foliage. 15 to 50 cts. each.

CROTONS. Beautiful and rich colored foliage, for conservatory decoration, exhibition and bedding. Leading varieties, 30 cts. to \$1.50 each.

CYPERUS Alternifolius (Umbrella Plant). Fine for house culture when liberally supplied with water. 15 and 25 cts. each.

DRACAENAS. Excellent decorative plants for house and conservatory

Fragrans. Broad dark green foliage. 75 cts. and \$1.50

Godseffiana. Rich dark green, with creamy-white

spots. 25 ets and \$1.25 each.

Indivisa. Long, narrow foliage used in vases, etc. 50 cts. to \$1.50 each.

Lindeni. Broad green foliage with golden-yellow

stripes on the edges. 75 cts. to \$3 each.

Massangeana. Like preceding with stripe through the center of leaf. 75 cts. to \$3 each.

Terminalis. Rich red foliage, marked with pink and white. 50 cts. and \$1.50 each.

FERNS. We have an immense quantity of nice bushy plants in fine varieties for filling dishes. \$1.25 doz.; \$8,hundred

Adiantums. In leading sorts. $2\frac{1}{4}$ -in. pots, \$1.50 doz.; 3-in. pots, \$2 doz.; 4-in. pots, 50 ets. each.

Pteris. In best varieties. 21-in. pots, \$1.50 doz.; \$8 hundred; 3-in. pots, \$2 per doz.; \$10 hundred; 4-in. pots, 50 cts. each.

Nephrolepes (Sword Fern) In following varieties: Bostoniensis, Piersoni, Scotti, Whitmani. 50 ets. to \$2 each.

FICUS (Rubber Plant). Extensively used in house decoration.

Elastica. The common rubber plant. 50 cts. to \$2.50

Pandurata. New, with beautiful foliage. \$1.50 to \$3 each.

Parcelli. Large deep green leaves, marbled with white. 50 cts, each.

MARANTA. Fine decorative plants, with beautiful variegated foliage.

Various Sorts. 25 and 50 cts. each.

PALMS.

KENTIAS, Belmoriana and Forsteriana. These are considered the hardiest palms and best adapted to house culture. The foliage is rich dark green and of spreading habit. 4-in. pots, 60 cts. each; 5-in. pots, \$1 each; 6-in. pots, \$2 each; 7-in. pots, \$3 each; 8-in. pots, \$7 to \$10 each.

COCOS Weddeliana. The most elegant and graceful of all the palms; the smaller sizes being excellent for fern dishes. 21-in. pot, 25 ets each; 3-in. pot, 40 ets. each; 6-in. pot, \$2 and \$2.50 each.

LATANIA Borbonica. Popular fan-leaved variety. 4 in. pot, 50 cts. each; 6-in. pots, \$1 each; 7-in. pots, \$1.75 each; 8-in. pots, \$3 each; 9-in. pots, \$4 each.

PHOENIX Canariensis (Date Palm). Dark green feathery foliage \$3 and \$5 each.

Roebelenii. Most graceful variety. 5-in. pots, \$2 each; 6-in. pots, \$3 each.

Rupicola. Long graceful arched foliage. \$4 to \$10 each.

SUMMER-FLOWERING BULBS AND TUBEROUS ROOTS

ACHIMENES

One of the finest summer-blooming plants for house or conservatory, giving handsome flowers of many shades and colors.

Named Varieties. \$1.00 per doz.; \$6 per 100. Mixed Varieties. 75 cts. per doz.; \$4.50 per 100.

ACIDANTHERA BICOLOR

Valuable Cape bulbs growing about two feet high, with graceful flower-stalks, each stalk having from four to eight beautiful creamy white, fragrant flowers with a purplemaroon blotch at the base of the petals. Best results will be had by planting in the open ground about June 1, where they bloom freely during August and September. Treat like gladioli 15 cts. each, \$1.50 per doz.

AMARYLLIS

These are the best suited for pot culture, and when established they should bloom every year; after blooming they make their growth and should have occasional waterings with liquid manure till about September, when they should be allowed to rest and given very little water. A soil composed of loam, leaf-mold and sand should be used

beautiful and fragrant. 15 cts. each, \$1.50 per doz.

Hippeastrum Hybrids (VITTATA). Large-flowered varieties with striped petals. '75 cts. each, \$7.50 per doz.

Halli (Lycoris Squamicera). Hardy variety with frag-rant rosy lilac flowers in August, foliage produced in spring disappears in June: 50 cts. each, \$5 per doz. Formosissima (Jacobæan Lily). Brilliant dárk crim-

son. 15 cts. each, \$1.50 per doz.

Johnsoni. Fine red, with white stripe through each petal. 40 cts. each, \$4 per doz.

Vallota purpurea (Scarborough Lily). Rich, bright scarlet flowers in a cluster, blooming in summer and autumn; this is the variety so much seen growing in tubs on lawns. 30 cts. each, \$3 per doz.

Zephryanthes rosea (Fairy Lily). Beautiful rose-pink. 5 cts. each, 50 cts. per doz., \$4 per 100.

Zephyranthes alba (White Fairy Lily). Pure white. 5

cts. each, 30 cts. per doz., \$2 per 100.

ANEMONE, FRENCH

These are also known as the Roman Anemone, and if planted outside in early spring will make a fine display in early summer of large poppy-like flowers in bright and beautiful colors. Plant 2 to 3 inches deep and 6 to 8 inches

Single, Mixed Colors. 20 cts. per doz., \$1 per 100. Double, Mixed Colors. 25 cts. per doz., \$1.50 per 100.

BEGONIA (Tuberous-Rooted)

Our assortment is from one of the most noted continental growers. The distinctive features of this strain are the dwarf, sturdy habit and erect flower stem, circular-shaped flowers of large size and rich colors, which for either private or exhibition purposes are superior to any strain offered

Single. Deep red, orange, rose, scarlet, white, yellow. 5 cts. each, 60 cts. per doz., \$4 per 100, \$35 per 1000.

Double. Red, rose, yellow, white. 10 cts. each, \$1 per doz., \$7 per 100, \$55 per 1000.

Fringed, or Frilled. New and improved strain; the giant blooms have beautifully fringed, wavy petals. Single dark red, pink, white, yellow, also mixture. 80 cts. per doz., \$6 per 100.

BESSERA ELEGANS

(Mexican Coral Drops)

Wonderfully free-blooming bulb, with long, narrow, grass-like leaves and slender flower-stalks, 1 foot high, carrying a loose umbel of flowers, each a scarlet bell marked with white lines. 5 cts each, 50 cts. per doz.

CALLA LILY (Richardia)

An old favorite and too well known to need any description. The only requisites for successful culture are rich soil and plenty of water when growing. By allowing them to rest through the summer an abundance of bloom may be had the following winter.

Elliottiana. Clear, deep canary-yellow; the best yellow variety 75 cts. each, \$7.50 per doz.

Spotted Leaf. Excellent for bedding. 10 cts. each, 75

cts. per doz., \$5 per 100.

CANNA (Dormant Roots)

A class of plants for grand effects. Their rich and varicolored leaves, combined with large and beautiful flowers of brilliant colors, make them very desirable for planting in groups on the lawn, or singly in beds. Keep the roots in a warm, dry place through the winter.

Robusta. Very dark foliage; robust grower, 6 to 8 feet.

10 cts each, \$1 per doz.

Large-flowering French, Mixed. Finest varieties. 10 cts, each, \$1 per doz.

GROWING CANNA ROOTS

Selected Large-flowering Varieties

15 cts. each, \$1.50 per doz. By mail, 5 cts. each extra Alsace. Sulphur changing to creamy white. 4½ feet Alphonse Bouvier. Tall brilliant crimson. 6 feet. Chas. Henderson. Fine crimson. 3½ feet. Chas. Henderson. Fine crimson. 3½ feet.
Cinnabar. Cinnabar-red, golden edge. 4½ feet.
Egandale. Soft currant-red, bronze foliage. 4 feet.
Florence Vaughan. Golden yellow, red spots. 4 feet.
Madam Crozy. Brilliant scarlet, golden border. 4 feet.
Mille. Berat. Nearest approach to pink. 4 feet.
Pres. Cleveland. Large intense orange-scarlet. 4 feet.
Queen Charlotte. Bright scarlet, yellow edge. 4 feet.
Red Indian. Beautiful apricot, dark foliage. 4 feet.
Souw. d'Antoine Crozy. Scarlet golden border. 31 ft. Souv. d'Antoine Crozy. Scarlet, golden border. 3½ ft. Tarrytown. The most brilliant dwarf crimson canna ever offered. 3 feet.

GIANT ITALIAN or ORCHID-FLOWERING

6 to 8 ft. high, with immense flowers, 15 cts. each.
\$1.50 per doz. By mail, 5 cts. each extra
Allemania (ITALIA). Orange-scarlet, edged with yellow.
Austria (Burbank). Pure canary-yellow, with red dots.
King Humbert. Grand Canna with broad bronze foliage and immense flowers of a brilliant orange-scarlet with bright red markings produced in gigantic clusters. Mrs. Kate Gray. Rich orange-scarlet. Pennsylvania. Intense vermilion-scarlet.

CALADIUM ESCULENTUM

One of the most beautiful of the ornamental-foliaged plants, either for culture in pots, or planting out on the lawn. They will grow in any good garden soil, and are of the easiest culture. The foliage is light green, veined with dark green, and the immense leaves are 3 to 4 feet long by 2½ feet wide.

Extra Large Bulbs. Four inches and over in diameter. 25 cts, each, \$2.50 per doz., postage 10 cts. each extra. First Size Bulbs. Three to 4 inches in diameter. 15 cts.

each, \$1.50 per doz.; postage 5 cts. each extra

Second Size Bulbs. Two to 3 inches in diameter. 10
cts. each, \$1 per doz.; postage 4 cts. each extra.

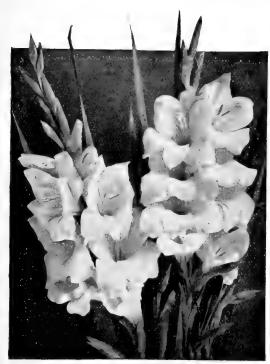

Pot-grown plants, ready in May, 25 cts. each, \$2.50

per doz.

CINNAMON VINE

(Dioscorea Batatas, or Chinese Yam)

A summer climber, with handsome glossy foliage; flowers possessed of a delicate cinnamon perfume; the root is hardy in deep, light soils. Large and selected roots. 10 cts. each, 75 cts. per doz., \$5 per 100.

America Gladiolus

DAHLIAS

These summer and autumn-flowering plants are more popular than ever. They should not be planted until the weather has become warm and settled in spring, and should be taken up before severe frosts in autumn. They require a sunny situation and rich soil, to bring out their full beauty. One shoot only should be allowed to each root. Roots should be kept in a warm, dry place during winter.

Dahlia Catalogue on application

GLOXINIA (Large Flowered)

Magnificent for house or conservatory, producing in great profusion beautiful flowers of the richest and most beautiful colors. They succeed best in sandy loam and peat, and require a moist heat.

GLADIOLUS

Of summer-blooming plants for general garden decoration, the gladioli are deserving of special attention. Requiring but little room for growth, they are exceedingly useful for planting among shrubbery in the border, while for massing in large beds, where a brilliant and effective display is desired, they are invaluable. They succeed best in good loam, enriched with well-rotted manure. Bulbs should be planted about 3 inches deep and 6 inches apart. apart.

Our mixtures are made up from fine varieties, and are all selected, first-sized bulbs and sure to give the best results. If wanted by mail, add 10 cts. per doz. for postage. 100 1000 Doz.

MADEIRA VINE

A rapid-climbing plant, with beautiful wax-like, light green leaves and feathery white flowers, with a delicious fragrance resembling mignonette. The culture is simple; the roots need but to be planted, and a trellis or strings given the vine to climb on. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

MILLA BIFLORA

One of the loveliest and most desirable bulbs known The flowers are borne on stems, two to three in number, of pure waxy white, and 2 inches in diameter. It will throw up as many as six flower-stalks from one bulb, and continue in bloom a long time. 5 cts. each, 50 cts per doz., \$4 per 100.

TUBEROSE

A bulbous plant of the easiest culture and most delightful fragrance, suitable for the summer garden or house culture throughout the year. They should be started early in pots, using good, rich, loamy soil, and when the weather is suitable, transplanted into the garden. The variety offered is the one most extensively grown, being much superior to all other sorts.

Excelsior Pearl. A superior strain, with very large double white flowers, produced in great abundance. Extra strong roots. 25 cts. per doz., \$1.75 per 100.

TIGRIDIA (Tiger or Shell Flower)

Extremely handsome, summer-flowering bulbs, growing about 2 feet high and producing freely throughout the summer large, gorgeous flowers exquisitely spotted. They require the same treatment as gladioli before and after blooming.

Mixture of best varieties. 50 cts. per doz., \$3.50 per

AQUATICS

The cultivation of aquatics is of the simplest; their requirements are sunshine, water and plenty of rich soil. They are divided into two classes, hardy and tender; the former may be planted in ponds, lakes or sluggish streams, early in the spring, and, under the same conditions as our native water lily, they will grow luxuriantly and flower profusely the entire season; provide the same conditions in artificial ponds or tanks, and the results will be equally satisfactory. Plant

AQUATICS, continued

the tender varieties at the approach of warm weather and when the water is warm. The plants can be grown in pots where protection can be afforded them until safe to transfer to summer quarters. The after-treatment is the same as for the hardy varieties. When grown in tubs, only the moderate growers should be selected. In storing in tubs through the winter, they should be kept where it is not warm enough to excite growth or so cold as to freeze.

HARDY VARIETIES

Dormant tubers of Nelumbiums can be supplied only from May 1 to June 15, after which date only such varieties
as we can furnish in pots should be planted.
Nelumbium Kinshiren. White shaded pink, free-flowering and early, tubers \$2.50, pot plants
Ker mesinum. Satiny carmine-rose; tubers \$1.50, pot plants
Luteum (American Lotus). Rich sulphur-yellow; tubers \$1, pot plants
Speciosum (Egyptian or Sacred Lotus). Perfectly hardy. The flowers are of a rose-pink, very fragrant; tubers
\$1.50, pot plants
Album grandiflorum. A grand white variety: tubers.
Nymphaea alba candidissima. Large white variety of the English Water Lily
Odorata. The well-known, white, fragrant pond lily
Odorata gigantea. A Southern form of the preceding, with larger flowers

SELECT LIST OF HARDY PERENNIAL PLANTS

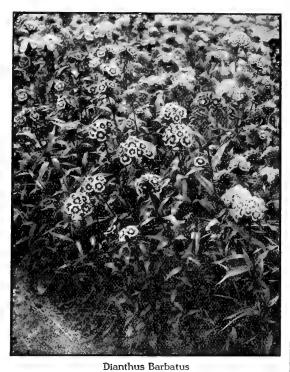

We would recommend those who have never undertaken the culture of hardy plants to commence with a few varieties most easily grown, and gradually increase their collections from season to season, and, our word for it, it will lead to a confession that there is nothing in the way of bedding-out or ribbon gardening which can compare in any way to the beauty and refined charm of this class of plants. We can furnish a good selection of hardy plants, which may be expected to give successional bloom throughout the spring, summer and fall months, and, if the choice is left to us, will take special care to select such varieties as afford the most satisfactory results.

Our connections with the best and leading nurseries at home and abroad put us in a position to furnish the very best of all hardy nursery stock. We also furnish estimates on the laying out, planting and improvement of private estates, and furnish experienced gardeners to carry out the work. We shall be pleased to correspond with those contemplating improvements or planting hardy stock of any sort.

Any sorts not listed can be furnished at lowest prices

ROSES

The rose is the one plant that needs no praise and little comment. Every one knows the rose, and no garden is ever satisfactory without its rose-bed. The secret of success is simply this: Throw out the soil 2 feet deep, and put in any kind of manure 1 foot deep, incorporate it with earth a little, and then cover it with 4 inches or more of soil, then plant the rose bushes firmly, and fill up with good soil. Roses should be planted very deep, except in very clayey soils.

The rose-bed should be in the full sun, if possible, and the surface be left a little hollow, so that water may be put on in summer and settle to the roots. Such beds will be full of healthy bushes and glorious blossoms.

HARDY HYBRID PERPETUAL ROSES

Strong 2-year-old plants 40 cts. each, \$4 per doz., \$30 per 100, by express only
Alfred Colomb. Bright, carmine-crimson, large and full.
Anna de Diesbach. Large, clear bright carmine. Baroness Rothschild. Rich satiny pink: excellent.
Baron de Bonstetten. Dark red, almost black; large.
Caroline de Sansal. Clear rose, darker in center.

Our native species, growing well in shady Maximum. places. 2 to 3 ft. \$2 each.

FLOWERING AND ORNAMENTAL HARDY SHRUBS

This class of plants does more for our gardens and grounds, to make them look attractive and homelike, than all other classes combined. It gives us beautiful foliage of many kinds, flowers from April to November, and clothes the lawn with that abundance of branches and leafage which is so necessary to any feeling of seclusion or privacy in our home grounds.

APPLES

Bright, healthy trees are sent from the nurseries, and no others. When received, they should have one-half of last season's growth cut back, and they will be sure to thrive. Nothing is so injurious to newly planted fruit trees, especially to those which have made a very vigorous growth the year before, and have long shoots of new wood, as to leave them full length. That is, the very best trees suffer most by leaving all the top on. Don't be afraid to cut. 75 cts. each, \$8 per doz.

SUMMER VARIETIES

Early Harvest. Yellow, medium size. Aug. Golden Sweet. Greenish yellow, large. Aug. to Sept. Red Astrachan. Red, large. Aug. Sweet Bough. Pale yellow, large. Aug. Tetofsky. Yellow and red; juicy. July and Aug. Williams Favorite. Red, excellent. Aug. Yellow Transparent. Pale yellow, good. Aug.

Anjou Sheldon Louise Bonne de Jersey Lawrence

PEACHES

Keep the leading branches well pruned back, and in the spring prune back all shoots of the previous year's growth, thus insuring sound and well-furnished heads with bearing wood, weak shoots being reduced one-half and stronger ones from one-third up, being careful to retain an ade-quate supply of fruit-buds. Keep the ground clean and well worked about the trees, and give an occasional dressing of wood ashes.

50 cts. each, \$5 per doz.

Champion. Creamy white, red cheeks; large. Aug. 1. Crawford's Early. Yellow and red; large. Aug. Crawford's Late. Yellow and red; large. Sept. Crosby. Yellow; treestone. Bept.
Early York. Red; medium. Aug.
Elberta. Large; light yellow. Aug.
Foster. Yellow and red; large. Aug
Hale's Early. White and red; medium. July.
Sept. White and red; large. Sept. Crosby. Yellow; freestone. Sept. Old mixon Free. White and red; large. Sept. Smock Free. Orange and red; large. Oct. Stump the World. White and red; large. Sept.

QUINCES

75 cts. each, \$7.50 per doz.

Apple, or Orange. Large roundish; bright golden yellow; very productive. Early to late. Champion. Large; yellow; very productive, and ripen-

ing very late. Rea's Mammoth. Large; yellow; one of the best. Early.

PLUMS

The growth of the plum tree is being better understood by cultivators, thorough culture and careful attention to the destruction of the black knot and curculio being the most essential points to consider.

5 to 6 ft.; \$1 each, \$10 per doz.

Bavay's Green Gage. Greenish yellow; large. Sept. Coe's Golden Drop. Yellow and large. Sept. German Prune. Blue; medium. Sept. Lombard. Violet-red; medium. Sept. Shropshire Damson. Purple; medium. Oct.

JAPAN PLUMS

These have quickly found favor among growers on account of their great vigor, freedom from disease, and the fact that they come into bearing two or three years after planting. They are of high quality, beautiful in appearance, and keep for an unusually long period after picking. \$1 each

Abundance. The fruit is large; amber in color, turning to a rich, bright cherry, and highly perfumed; flesh tender and of delicious sweetness. It ripens in August, and cannot be too well spoken of for its adaptability to general cultivation.

urbank. Clear cherry-red, with yellow dots; flesh deep yellow, rich and sugary. The tree is low and preading,

and an abundant bearer.

wickson. A magnificent hybrid. A cross between Burbank and Kelsey, and thought to be the finest yet produced. Fruit large, dark, showy and of the highest quality. Free, most vigorous and prolific.

SMALL FRUITS

CURRANTS

\$1.25 per doz., \$8 per 100 Black Naples. Large, black, for preserves. Cherry. Large, red, popular sort.
Fay's Prolific. Largest and finest red. Red Cross. Excellent quality, good size and prolific Versaillaise. Large, red, excellent. White Grape. Very large, white.

BLACKBERRIES

To keep a blackberry bed in good productive condition, the old, weak and dead wood should be cut out every season to give strength to the young shoots for the next year's bearing. In spring the weakest suckers should be removed, leaving five or six of the strongest in each hill; the ground should be spaded and a top dressing of manure given. Rows 5 feet apart and plants 4 feet apart in the rows.

\$1 per doz., \$5 per 100 Agawam. Sweet, medium size. Early.

Eldorado. Extra fine and very hardy, large, sweet berry.

Erie. One of the best; large and productive. Early. Lawton. Large, sweet and fine. Late.
Snyder. Medium size; very fine. Medium. Wachuset. Fair size, good quality. Comparatively free from thorns. Medium. Wilson, Jr. Large, excellent. Early.

RASPBERRIES

Treat and cultivate as recommended for blackberries
\$1 per doz., \$5 per 100

Clarke. Large, red, firm; one of the best.
Cuthbert. Medium to large, red, sweet.
Marlboro. Popular red sort. Early and hardy.
Shaffer's Colossal. Large, purplish red; fine.
Loudon. Very prolific; one of the hardiest; best red sorts.
Golden Queen. Large, vallow and firm; fine quality. Golden Queen. Large, yellow and firm; fine quality. Gregg. Large, black cap, great bearer.

Mammoth Cluster. Large and productive, black cap.

Souhegan. Large and early, black cap.

GOOSEBERRIES

Industry. An English variety with large dark red fruit. free from mildew. \$2 per doz.

Red Jacket. An American variety with large ruby-red ruit, fine flavor and free from mildew. \$2 per doz.

Pearl. Prolific sort; free from mildew. The fruit is large; light green and fine quality. \$2 per doz.

Downing. Whitish green, prolific. \$1.50 per doz.

GRAPES HARDY VARIETIES

50 cts. each, except where noted BLACK

Concord. Large, always reliable. Medium.
Eaton. Very large, new. Medium.
Hartford. Large and productive. Early.
Campbell's Early. Very large berry and clusters, rich

flavor and very sweet.

Moore's Early. Large, fine quality. Early.
Wilder (Rogers' No. 4). Very large. Medium. Worden. Large, excellent quality. Early. RED

Brighton. Large, best quality. Early. Delaware. Small, delicious. Late. Ionia. One of the finest table grapes, high flavor and long keeper. Late. Vergennes. Large, splendid.

Vergennes. Large, splendid. Medium.

WHITE

Empire State. Tender. Medium.

Green Mountain. One of the best. Early.

Moore's Diamond. Large, excellent. Early. Niagara. Large and productive. Medium.

FOREIGN VARIETIES

For growing under glass, strong planting canes \$3 to \$4 each; fruiting canes \$5 to \$7 each
BLACK

Alicante. Very large, fine quality.

Black Hamburg. The best for general use.

Gros Colman. Very large, sweet and juicy.

Madresfield Court. Large, rich muscat flavor.

WHITE

Bowood. Large, with a sweet muscat flavor. Golden Chasselas. Large, excellent sort.
Golden Hamburg. Large bunches, one of the best. Muscat of Alexandria. A delicious variety.

STRAWBERRIES

The strawberry will grow in any good garden soil where the ground has been thoroughly prepared. For family use we recommend planting them in double rows, 1 foot apart each way and 5 feet between the double rows, allowing a sufficient number of runners to grow into the wide passage to cover about 1½ feet on each side; all the rest should be pinched off. It is advisable to cover the plants in winter with litter, which should be removed as soon as the plants commence to grow in spring.

Layer plants in spring, \$1 per 100, \$7 per 1000, except where noted. Pot-grown plants after August 1,\$3 per 100, \$25 per 1000.

Abington. Strong grower and great yielder. The bright red berries are of very large size, firm and fine flavor. Early to medium.

Barrymore. Awarded silver medal and three first premiums by the Massachusetts Horticultural Society, in 1908. A great berry for all purposes. Large size, rich, dark, glossy crimson color; conical shape; ficsh red and quality excellent. Medium. 50 cts per, doz., \$2.00 per 100.

Brandywine. Large, roundish conical, bright, glossy crimson berries, firm and solid; excellent quality and

fine flavor. Medium.

Bubach No. 5. (P.) Very large and productive, bright scarlet; a fine market sort. Early to medium.

Commonwealth. Large, glossy crimson berry, of excellent quality, a great cropper and one of the latest.

Gandy. Large, bright crimson berries of uniform size best of late sorts, ripening two weeks after Sharpless. Glen Mary. Very large, highly colored, firm, and ranks with the best in flavor. Medium to late.

Golden Gate. New seedling, resembles the Marshall and will succeed where the Marshall fails. It produces strictly fancy, firm fruit clear to the end of the season. of a rich crimson color.

Marshall. Large, rich crimson, and fine flavor. One of the most popular sorts. Medium.

Minute Man. (P.) Very productive, long-season sort, of excellent quality. Medium to late.

Nick Ohmer. Largest size, regular form, excellent flavor, firm, and a deep glossy red. Medium.

Sample. (P.) Large, bright scarlet; very prolific and fine quality.

Success. Large, round, bright scarlet, flavor always fine. Early.

NEW EVERBEARING STRAWBERRIES

Pan-American. A most persistent bloomer from May till November. It is better to nip off the first stems as more will appear, and they will continue to appear all summer and fall. In 25 or 30 days from the time we stop removing the blossoms we will get ripe fruit. The fruit is of good size and nice quality. Some single plants will bear a quart of fruit or more. With a little protection on cold nights, they will continue to bear until almost Thanksgiving time. 25 cts. each., \$2 per doz., \$12 per 100, by express.

The Autumn. A strong, healthy, vigorous plant, which makes a lot of runners. The parent plant produces an enormous crop of medium sized, handsome fruit, perfect in shape and very dark colored, in August, September and October As this is a pistillate variety, it should have some Pan-Americans grown with it to fertilize its blossoms. \$1.50 per doz., \$8 per 100, by express.

FARM, GARDEN AND LAWN REQUISITES, TOOLS, ETC.

Asparagus Buncher and Trimmer, Houghton's. Makes bunches in two sizes and trims them. each.

Asparagus Knife. Granite State; 40 cts. each, by mail 50 cts.

Warranted steel, Wetherell's extra quality, Axes. handled. \$1 to \$1.25.

Axle Grease, Fraser's. 10-lb. bucket, \$1.35; 25-lb. bucket, \$1.75.

Balls, Ox. Brass. 5 and 10 cts. each.

Bars, Crow. Solid cast steel. Per lb. 7 cts.

Baskets, Verbena. Wire handle attached, 10 inches long, 5 inches wide, 3 inches deep. \$2.00 per 100; \$18.00 per 1000.

Baskets, Verbena, Large Size. Have adjustable wooden handles with tin fastenings, 10 in. long, 7 in. wide, 4 in. deep. \$3 per 100; \$25 per 1000.

LAWN MOWERS

"Coldwell" Improved Horse Lawn Mower. They are furnished with shafts, seat and side draft attachment, which keeps the horse on the cut grass only. Each mower warranted to give complete satisfaction. The new attachment for instantly raising the knives when travelling along roads and stony places is very convenient.

25 in.	With whiffletree; no seat or shafts	\$45.00
30 in.	Complete with seat and shafts	75.00
35 in.		
40 in.	Complete with seat and shafts	115.00

Coldwell's Imperial Lawn Mowers. The best lawn mowers in the market. The principal feature of these machines is that the bottom knife-bar is bolted to the sides, thus making the frame perfectly rigid, while by a new patent hanger the revolving cutter is adjusted to the bottom knife. This is the reverse of the adjustment in all other mowers. When the knives are properly adjusted a lock screw secures them in position.

	Mfr's Price	Net Cash Price
14 in.	\$20.00	\$8.50
16 in.	22.00	9.50
18 in.	24.00	10.50
20 in.	26.00	11.50

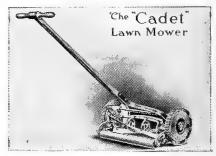

Coldwell's Chain Roller Mower for Golf Links and Borders. In addition to the usefulness of this mower for regular lawn work, it will perfectly cut the grass on borders even though they are narrow strips of sod between flower-beds and walks, where a side-wheel mower would have one wheel off the border. The Chain-Roller Mower is strictly high grade and should last for years. The chain, in place of gears, reduces the noise and friction. The Self-Dumping Grass Catcher is the best ever used.

14 inch, 4 blades \$11.75, 6 blades \$12.50; 16 inch, 4 blades \$13.00, 6 blades \$13.50; 18 inch, 4 blades \$14.50, 6 blades \$15.00.

Grass Catchers 14 inch, \$1.85; 16 inch, \$2.00; 18 inch, \$2.15 extra.

Grass Catchers for Imperial Mowers. 12 inch, \$1.70; 14 inch, \$1.85; 16 inch, \$2.00; 18 inch, \$2.15; 20 inch, \$2.30.

The "Cadet." This is a good lawn mower to sell at a medium low price, and give the purchaser full value for his money. It has brass bushings and the same ratchets and adjustments that are used on many of the high-grade mowers. The gears are fine cut, and it is in every respect what is needed at the present time, viz., a mower that will do good service and at a cost but little higher than the poor trash that is put out so freely. 14 in., 16 in., price each \$3.50.

Lawn Mower Repairing

We make a specialty of repairing lawn mowers, and, as we carry a complete stock of repairs for all leading machines, we are enabled to ship promptly and guarantee every machine we repair to work in a satisfactory manner.

Style "D" Motor Lawn Mower. Coldwell's Style "D" Motor Lawn Mower is equipped with the latest model automobile motor. These motors are 12 H. P., of the vertical, 4-cycle type, furnished with the most up-to-date oiling system, two independent systems of ignition (Bosch Magneto and dry batteries), Schebler carburetor, etc. It is also equipped with Coldwell's patent non-slip rollers, which, being fitted with compensating gears, permit the machine to turn completely around in an eight-foot circle.

The motor used on this mower is powerful enough to maintain the proper cutting speed up 25 per cent grades, and it thus dispenses with complicated change speed mechanisms. Should a lower speed be desired it can be accomplished by throttling the motor, thus saving fuel.

The gears and sprockets are cut from the finest steel, the chains used are such as are found on all the best chain-driven cars and are far better adapted for use on a slow-moving vehicle of any kind than gears, being more cheaply and quickly repaired.

The cutting frame floats absolutely independent from the traction roller frame, which prevents the knives from being forced into the ground by the weight of the traction part.

Style "D" 2 cylinders—4 cycle. Specifications: Width of cut, 40 inches; length over all, 8 feet; width over all, 5 feet; height over all, 4 feet 7 inches; weight, 2000 pounds; diameter drive rollers, 21 inches; power of engine, 12 horse-power; amount of gasoline required per hour, ½ to 1 gallon; hill-climbing ability, 25 per cent grades; cutting capacity, 1 to 1½ acres per hour. Price, \$1500.

Philadelphia Lawn Mower. Style A. 10-inch wheel, 4-blade cylinder; train of gears on one side with double ratchet, making both wheels drivers. Made of steel. 17 inch, \$14.00; 19 inch, \$15.00.

Style E. 10-inch wheel, 4 blades. 17 inch, \$10.00; 19 inch, \$11.25.

Style K. 10-inch wheel, 5 blades, geared on both sides. 16 inch, \$7.50; 18 inch, \$8.00.

Style M. 7-inch wheel, 3-blade cylinder with solid wipers. 16 inch, \$7.50; 18 inch, \$8.00.

FARMOGERM

High Bred Nitrogen Fixing Bacteria.

Raises Larger Crops of Peas, Beans and Clovers - Raises Alfalta where others have failed.

All the nitrates your land needs for \$2.00 per acre. You put it on the seed before they are planted and nature does the rest.

Farmogerm takes nitrogen from the air, turns it into soluble nitrates and feeds your legume plants.

Bacteria make nodules; Nodules mean nitrates; Nitrates mean big crops.

Improve your land by the use of Farmogerm high-bred bacteria, which add nitrogen

to the soil for future crops.

The best mixed stable manure contains ½ of one per cent. of nitrogen. Farmogerm will produce nodules upon roots of legumes which contain eight per cent. of nitrogen, or 16 times that amount that manure contains, and you save the labor of hauling, etc., etc.

Farmogerm is put up in bottles in the following sizes:

Garden size, containing material to treat the seeds for 1-6 acre of land \$0.50 each Acre " " " " " 1 " " . . . 2.00 each Five acre size " " " " " 5 " " . . . 9.00 each

For the following crops in Acre Sizes: Red Clover, Mammoth Clover, Crimson Clover, White Clover, Burr Clover, Sweet Clover, Alsike, Alfalfa, Berseem, Peanuts, Vetch, Lupins, Garden Beans, Garden Peas, Sweet Peas, Cow Peas, Canadian Field Peas, Soy Beans, and all other legumes.

In Garden Sizes: For Peas, Beans and Sweet Peas; also a mixed culture good for all three.

In Ordering state what crop you wish to plant; quantity wanted, and ask for book on the Farmogerm Method.

WE ARE NEW ENGLAND HEADQUARTERS FOR THE SYRACUSE CHILLED PLOW COMPANY

AND CARRY IN STOCK A FULL LINE OF

Plows, Harrows, Cultivators, Drag Scrapers, Wheel Scrapers, Steel Wheelbarrows, Canal Barrows and Hand Push Carts

Also, A Full Line of Repairs in Stock

BARROW, SYRACUSE "PERFECT"

For conveying concrete, mortar, sand, gravel, cement, fertilizer, manure, etc.

The Syracuse is an end dumping barrow; has protected wheel and renewable shoes on legs; is provided with cross bar between legs for plank riding; carries load level and well over wheel; has an extra strong strapped tray, smooth on inside, and many other good points. Price, \$5.00 each.

CULTIVATORS, SYRACUSE STEEL FRAME.

We would call particular attention to our superior form of construction, by which the cultivator may be varied from the narrowest to its widest position with one motion and with no change of bolts, and when closed up does not get on dead centre or become difficult to open.

No. 138. Expanding lever. Five 3-in. points, wing points, shovel points and lever wheel, \$8.00. No. 33. Expanding lever. Five 3-in. points, wing points, shovel points and stationary wheel, \$7.50.

No. 53. Five 3-in. points, wing points, shovel points and wheel, \$6.00.

No. 81. Five 3-in. points and wheel, \$5.00.

These cultivators are made with an extra long and heavy frame and are fitted up with Jersey points and long hiller sweeps which are unsurpassed for hilling-up potatoes and other crops.

With the standards and points removed excepting

With the standards and points removed, excepting the one on the centre bar, the cultivator is formed into

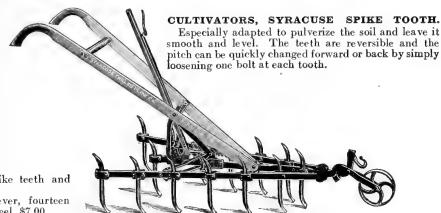

a furrowing plow; for by reversing the sweeps and fastening the centre standard at the rear end of the bar it is changed to a coverer.

No. 101. Expanding lever, five Jersey points, hiller sweeps and wheel, \$8.00.

No. 156. Expanding lever, five Jersey points, hiller sweeps and lever wheel, \$9.00,

FARM AND GARDEN TOOLS AND IMPLEMENTS, continued

No. 111. Fourteen spike teeth and wheel, \$6.00.

No. 114. Expanding lever, fourteen spike teeth and wheel, \$7.00.

HARROWS, SYRACUSE SPRING TOOTH, WITH LEVERS.

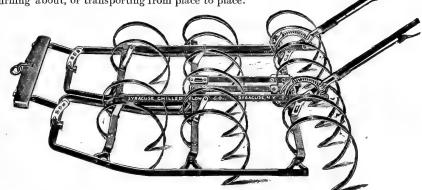

Frame, tooth-bearing bars and teeth are steel. The frame runs on steel shoes, which can be renewed at small expense. All castings malleable. Superior work. Most convenient for cleaning and turning about, or transporting from place to place.

Price

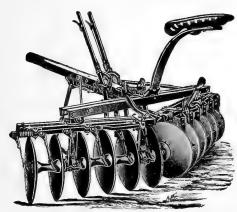

15 tooth, two horse, with plain teeth; weight, 236 lbs...\$18.00

15 tooth, two horse, with wheel; weight, 247 lbs............. 20.00

17 tooth, two or three horse, with wheel; weight, 286 lbs....21.00

HARROW, SYRACUSE ALL STEEL-FRAME DISC.

For crushing clods, pulverizing hard-baked clay land, or cutting up sod ground, no harrow rivals the new Syracuse.

We show in the above the new Syracuse Steel-Frame Disc Harrow with double lever.

The frame, both in the crosshead and gang beams, is made of double bars of highly tempered angle steel, giving both strength and rigidity. Attached to the frame are steel arms which connect the bearing boxes. Each gang has a double-jointed hinge which acts vertically and horizontally, giving flexibility and free action when working on uneven ground. By means of the adjustable hold-down casting at the inside ends of the gangs, the harrow can be made to cut at a uniform depth the full length.

Oil-tempered steel discs, either round or cut, are furnished, the latter being sent only on special orders.

We furnish the cut-away disc as well as the plain when so desired. Prices on application.

PLOWS, SYRACUSE

No. 5 Vineyard and Garden Plows. Chilled wearing parts. The most popular plows in use in vineyards and hop yards. Horse can walk in the furrow or on the land. Handles can be adjusted sideways or up and down. Price Iron or wood beam, one-horse plow, plain...... \$6.50 Iron or wood beam, one-horse, with wheel..... \$7.50 No. 50. Very Light One Horse. Wood beam, plain. Especially adapted to light soils. Strong Price turning qualities. Sloping landsides. Chilled wearing parts.

No. 51. Light One Horse. Wood beam, plain.

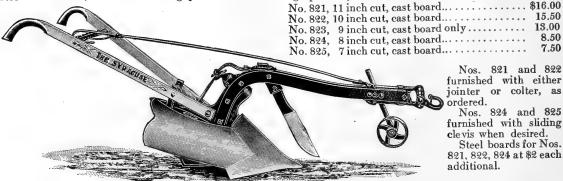

No. 52. Medium One Horse, Wood beam, plain. \$6.00 7.00 8.00

No. 31. Steel Beam, Steel Plow. Large two horse, commonsteelmoldboard with wheel and jointer. Price.....\$16.00 No. 32. Steel Beam, Steel Plow. Medium two horse, common steel moldboard, with wheel and jointer. Price \$15.00

PLOWS, NEW STEEL TRUSS BEAM SYRACUSE HILLSIDE.

Our latest series of five plows. In this series is incorporated the experience gained by 50 years of plow building. We call attention to their light weight, large throat capacity, absence of open joints to catch trash, steel truss beam, and cast wearing parts that interchange perfectly.

Nos. 821 and 822 furnished with either jointer or colter, as ordered.

Nos. 824 and 825 furnished with sliding clevis when desired.

Steel boards for Nos. 821, 822, 824 at \$2 each additional.

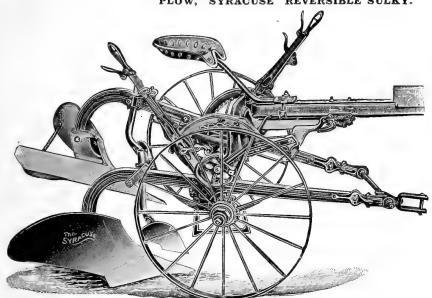

The "Diamond" Swivel Plows. For Hillside or Level Land. A popular plow of improved construction. Good material and nicely fitting parts. Made with foot latch, side shifting clevis. Cast and steel mold-boards and chilled points.

"Diamond A" Medium 2 Horse, cast board, with wheel and cutter. 15.00

"Diamond C" Light 1 Horse, cast board, plain 8.00 PLOWS, SYRACUSE CONTRACTORS'.

No. 98. Four to six horse. Adjustable and double reversible bar steel point. Adjustable shoe in place \$25.00

FARM AND GARDEN TOOLS AND IMPLEMENTS, continued

Steel Moldboards and Strips.

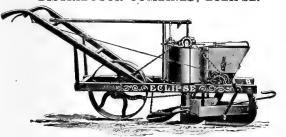

Chilled or Steel Points.

Does perfect work on hillside or level land. No ridges or dead furrows. Light and strong. Simple and practical. Power lift for raising the plows. An adjustable pole regulates the width of furrow, also avoids all side strain on the team. Lighter in draft than a hand plow doing the same work. (Send for special circular.) With each sulky is fur-

nished two extra cast points, a screw wrench, neck yoke and two horse whiffletrees.

If it is desired to use three horses on the above sulky, attachments can be furnished when ordered. Price, on application.

CORN PLANTER AND FERTILIZER DISTRIBUTOR COMBINED, ECLIPSE.

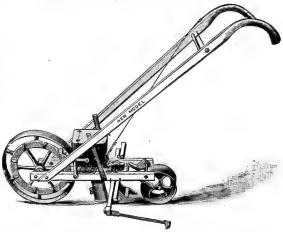

For planting field or ensilage corn, beans, peas or beet seeds, in hills or drills with check. Will accurately distribute all commercial fertilizer, wet as well as dry, pulverized hen manure, plaster, ashes and other fer-tilizers of like consistency, with a certainty. Has con-cave places each side of plow, which are of great importance in placing moist earth on the seed, just before the fertilizer is dropped each side of seed. A great advantage in a dry season. Price, \$25.00.

CORN PLANTER AND FERTILIZER SOWER COMBINED, KING OF THE CORNFIELD.

Plants Corn, Beans, Peas, Beet and Other Seed of Like Size.

This is the only machine made that can plant two kinds of seed in alternate hills. The concave wheel covers the corn nicely. We have thousands of testimonials of their superior merits from dealers and users. Weight, 180 lbs. Price, \$25.00.

SEED DRILL, THE NEW MODEL.

This we consider the simplest and best drill on the market. The diamond-shaped adjustable hole regulates the discharge, and can be made larger or smaller as occasion requires. No other drill has this advan-tage. The seed cut-off claps up underneath the hole; it does not slide under the same, as in other similar drills; on this account it does not clog nor cut the seed. It has a broad wheel and a covering roller. The opening plow is adjustable in depth. The whole make-up of the drill is simple. It can be worked by any one. Price, \$8.00.

FARM AND GARDEN TOOLS AND IMPLEMENTS, continued

CULTIVATOR, THE "IRON AGE" SINGLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE.

For general work there are no hand tools made to compare with the "Iron Age." They do the work. The tools are built of the best possible material and the prices are as low as such high-grade stock will admit of.

This tool is, in regard to the work done, almost a counterpart of the double wheel hoe, and the same remarks as to its construction, extreme lightness, and ease of operation will apply with equal force. In addition, its lower price, less weight, and increased steadiness given by a single wheel make strong arguments in favor of this tool. For the small kitchen garden we consider the single wheel hoe very valuable. The work is done principally between the rows, although the plants of small growth can be hoed on both sides at once by placing the wheel on the left side. With this single wheel tool, spaces of exceedingly narrow width can be worked, even using but one cultivator tooth. With the large plow attachment, deep furrows can be opened or closed; potatoes, celery, and other crops hilled; in short, all such work usually accomplished by a special plow. Packed weight, 28 pounds. Price, \$5.25.

We also have a weeder attachment for this tool similar to those used on the double wheel hoe, a capital thing. Price, \$1.00.

FERTILIZER SOWER, THE STEVENS' HAND

Does the work perfectly, sowing all kinds of lawn dressing and other commercial fertilizers, wood ashes, lime, etc., in large or very small quantities. It can also be successfully used for fertilizing strawberry beds, and other garden or field work; is excellent for sifting wood or coal ashes, sawdust, or dry sand on icy walks; will also sow damp sand by removing two blades.

The hopper is 34 inches long and holds one and one-half bushels. Weight of machine, 83 pounds. It is well made and nicely painted. Price, \$14.00.

ROLLERS, GARDEN AND LAWN.

Rollers are almost a necessity in the making and care of a lawn. In the spring after the freezing and thawing season the ground becomes uneven and porous, receding from the grass roots. If allowed to settle without being rolled the lawn is left rough and uneven, and much of the grass dies. If pressed down firmly and evenly with a roller the chances for a thick, velvety lawn are more favorable. The Gold Medal rollers, which we offer, are turned perfectly smooth on the outer surface. The edges are beveled and they have steel axles with rigid handles.

The weights are attached to the handle on outer face of sections, therefore no strain whatever on the axle. These weights form a counter balance, keeping the handle off the ground at all times.

These are the rollers you no doubt have heard of. They run so easy it is real play to operate them. Guaranteed to draw 44 per cent lighter than any other roller in the world.

REPAIRS.

We carry a full line of repairs for all the leading plows, cultivators, harrows, mowing machines, rakes, tedders, etc.

We have greatly enlarged our repairing department, and with our skilled mechanics, who have had many years' experience at this kind of work, we are now placed in the best possible position for repairing of all kinds of farm and garden tools and implements. We devote special attention to this feature of our business, and can do first-class work at reasonable prices.

FARM AND GARDEN TOOLS AND IMPLEMENTS, continued

In the construction of this machine, all the best features of the Improved Bullard and Mudgett Tedders are used, with valuable improvements of our own, and our aim to make a tedder that will be more durable and cost the user less for repairs than any machine now on the market, we believe has' been fully accomplished. Price on application.

HAY TEDDER, THE DEERING.

Light draft, noiseless, simple, durable and ease of operation are ample proof that the machine has been built on the right principles and of the best material. Wheels high; forks on the outside; frame cannot twist or sag; spring steel fork; coil springs to prevent breakage. The frame tilts up, relieves the forks should they strike. Combination thills and pole. Price on application.

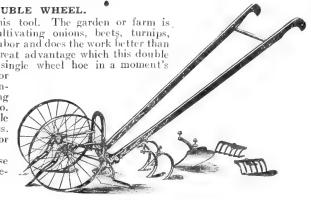

HAY RAKE, THE DEERING IDEAL.

A rake must be strong, simple and durable to make it valuable. The Ideal Rake is noted for those qualities. They are constructed of the best steel. The angular steel parts are hot riveted instead of bolted, which renders it less liable to get out of repair. The wheels are interchangeable, and are the strongest ever put on a rake. The teeth are made of the finest oil-tempered spring steel. Operator may adjust the rake to regulate the height of the teeth and the time of their return to the ground. Combined pole and thills are furnished with every rake. Price on application.

HOE, THE "IRON AGE" DOUBLE WHEEL. At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of them. In cultivating onions, beets, turnips, radishes, etc., it is invaluable; saves hours of hard labor and does the work better than several men could do it in the same time. One great advantage which this double wheel hoe possesses is that it can be made into a single wheel hoe in a moment's time. An axle is sent with every double wheel hoe for this purpose. The wheels are sixteen inches high, enabling the wheel hoe to run easy and without yielding to the depressions of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$7.00.

In order to accommodate those who have only use for the wheel hoe for hoeing, we offer the machine described above, with hoes only, at \$4.25.

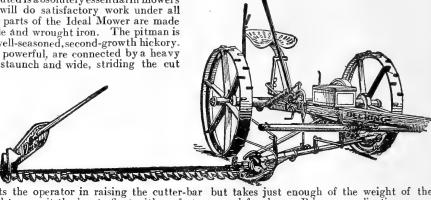

THOMAS J. GREY CO.'S SEED CATALOGUE FARM AND GARDEN TOOLS AND IMPLEMENTS, continued.

MOWER, THE DEERING IDEAL.

Weight properly distributed is absolutely essential in mowers to insure machines that will do satisfactory work under all conditions. The working parts of the Ideal Mower are made of the best steel, malleable and wrought iron. The pitman is long and strong, made of well-seasoned, second-growth hickory. The wheels are high and powerful, are connected by a heavy steel axle. The frame is staunch and wide, striding the cut

grass, so that the wheels travel in a clear track. Deering roller and ball bearings make the Idea! Mower so light in draft that it is a worthy example of the well-known Ideal line of machines. Ideal Mowers have a perfectly floated cutter-bar; a

coil spring not only assists the operator in raising the cutter-bar but takes just enough of the weight of the cutter-bar off the ground to permit the bar to float with perfect ease and freedom. Price on application.

MOWER, DEERING ONE-HORSE.

This gives entire satisfaction on farms, salt meadows and orchards. Many of the parks use it. Like the Ideal it is fitted with ball bearing rollers, long wooden pitman, forged steel couplings, a positive and direct stroke. Its action perfectly free, which makes it the most durable, easy of handling and lightest draft mower made. Cuts 3½ and 4 feet. The foot lift cannot be surpassed. The Deering Mower knives and section are made from a special grade of steel. They are stamped with the name Deering, a satisfactory guarantee. Price on application.

PLOWS, HUSSEY HARD METAL.

Superior workmanship, strength, durability, lightness of draft, thoroughness of work, scouring capacity in every kind of soil, steadiness in the ground, and facility of adaptation to all kinds of work, are the qualities possessed by the Hussey Plows which have made them such favorites among farmers and dealers.

Among the recent improvements added to our plows, we might mention that we are using a solid steel cutter, and steel truck-straps, and that we have lengthened the iron strap under the beam so that it now extends from the standard to the clevis.

Any information about our plows or cultivators, not given in this catalogue will be gladly furnished.

No. 100. One Horse. Furrow 5 to 6 in. deep, 10 \$8.00 No. 102. Light Two Horse. Furrow 5 to 7 in. No. 103. Light Sward. Furrow 6 to 8 in. deep,

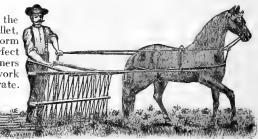

No. 104. Medium Sward. Furrow 8 in. deep, 16 in. wide...... \$13.00 No. 108. Heavy Road. Furrow 8 to 10 in. deep, 18 in. wide.....

WEEDER AND CULTIVATOR, THE UNIVERSAL.

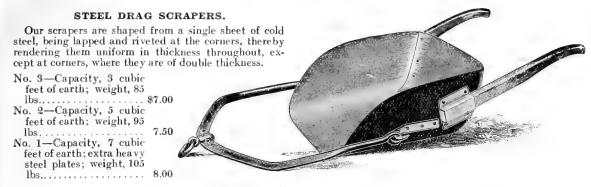

A perfect weeder for all hoed crops, and does away with the use of the hand hoe. For putting in grain, grass seeds or millet, it has no equal; distributes the seed evenly and at a uniform depth, at the same time pulverizing the soil and forming a perfect ! We recommend the weeder to all market gardeners as an implement well adapted to perform many kinds of work which generally takes a great deal of time. Easy to operate. Light to handle. A great saver of time and money.

Permanent tooth weeder, \$4.50. Removable tooth weeder, \$5.50.

Send for special descriptive circular.

FERTILIZERS

Prices subject to change.

Acid Phosphate. 14 to 16 per cent soluble and available phosphoric acid. 100 lbs., \$1.25; ton, \$20.

Ashes, Unleached Hardwood. As a fertilizer for lawns, gardens, and fruits hardwood ashes are unequalled; they are not a mere stimulant, but supply natural plant food, permanently enriching the soil. Clean, free from offensive odors, and can be applied by any one. They are exceedingly valuable for lawns, imparting a rich, dark shade of green and destroying many of the insects which are so injurious. In bags, per 100 lbs., \$1.25; per ton, \$20.

Bone Black, Dissolved. Contains 16 to 18 per cent soluble and available phosphoric acid. Price per

100 lbs., \$1.50; ton, \$28.

Bone, Coarse or Cracked. Ground coarse for grape

borders or poultry. 100 lbs., \$2.50.

Bone, Fine Ground (Bone Meal). One of the best fertilizers to use for general purposes. 10 lbs., 50 cts.; 25 lbs., \$1; 50 lbs., \$1.50; 100 lbs., \$2.50; barrel, about 200 lbs., at 2\frac{1}{4} cts. per lb.

Bone, Pure Flour of. Ground perfectly fine; excellent for pot plants or beds where an immediate effect is wanted. Per 100 lbs., \$3; in barrels, about

175 lbs., at 2½ cts. per lb.

Bradley's Superphosphate. This well-known fertilizer has been a standard for years. It quickens the growth of the crop and brings it to earlier maturity. 100 lbs., \$1.80.

Clay's Fertilizer. This valuable imported manure

is especially recommended to all who grow either fruit, flowers or vegetables, and wish to bring them to the highest perfection. Should be used in potting soil and spread on staging of greenhouses planted with flowering plants, etc. Per bag of 14 lbs. \$1.25; 28 lbs., \$2.25; 56 lbs., \$4; 112 lbs., \$7.

Chrysanthemum Manure, Thomson's Special. Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaped dessert-spoonful will be sufficient for a 10-inch pot, sprinkled over the surface of the soil and watered in with tepid water. This may be done three times during the growing season. Price per lb., 25 cts.; 7 lbs., \$1.25; 14 lbs., \$2.25; 28 lbs., \$4; 56 lbs., \$7.

Charcoal. Coarse and fine. Each per bushel, 60 cts.; per barrel sack, \$1.25.

Cotton Seed Meal. 100 lbs., \$2; ton \$36.

Dried Blood. 12 to 14 per cent ammonia. Per 100

lbs., \$2.50; per ton, \$48.

Hill and Drill Phosphate, Bowker's. A valuable fertilizer which can be used with equal profit for the hill or drill or sown broadcast. It is one of the richest and quickest acting fertilizers and may be profitably used on any soil. 100-lb. bag, \$1.80; ton, \$34.

Kainit. 23 to 35 per cent sulphate and muriate of potash; 12 to 13 per cent actual potash. 100 lbs.,

\$1.25; ton, \$16.

Lawn and Garden Dressing. An odorless fertilizer, prepared entirely from chemicals, and designed for top-dressing lawns. It is quick and lasting in its effects, and produces a thick, velvety sward. Trial bags for 1000 square feet, 50 cts.; trial bags for 2500 square feet, \$1; 50-lb. bags for 5000 square feet, \$1.75; 100-lb. bags for \(\frac{1}{4}\) acre, \(\frac{83}{3}\); ton, \(\frac{850}{4}\).

Imperial Plant-Food Chemicals. Rich in phosphates, nitrogen and potash, the well-known essentials of plant life, combined in the best proportions ascertained from years of careful experimenting. Odorless. We offer the "Chemicals" in dry form as follows:

Packages Diluted for use containing making 9 oz. (biscuits) 50 gallons, by mail, 35 cts.... \$0.25 250 gallons 1.00 3 lbs. (biscuits) 7 lbs. 500 gallons.....

20 lbs. 1,500 gallons..... 4.00 50 lbs. 3,600 gallons..... 8.00 7,200 gallons 14.00 100 lbs.

1.60

Directions with each package.

This material is over three times as strong in actual plant-food as any other commercial fertilizer.

A similar mixture is designed for lawns and golf greens, and used by all the best golf clubs, is sold in the same sized packages, and at prices as above.

Lime, Agricultural. An unusually pure calcium lime, especially prepared for use on the soil. Shipped in the form of a dry powder in jute bags of 100 lbs. each. Per bag, \$1; ton, \$13.

Land Plaster, or Ground Gypsum. Valuable as an absorbent, disinfectant and insecticide. 5 lbs., 15 ets.; 25 lbs., 50 ets.; 100 lbs., 75 ets.; ton, \$12.

Muriate of Potash. 80 to 85 per cent. Price, 10 lbs., 50 cts.; 100 lbs., \$2.75; ton, \$46.

Nitrate of Soda. 95 to 98 per cent purity. Price, 10 lbs., 50 cts.; 100 lbs., \$3.25; ton, \$55.

Sheep Manure. This is a pure, natural manure, and the most nutritious food for plants. Its effect is immediate, much more lasting and healthy than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest and quickest liquid manure, without any deleterious effects. We offer two brands.

Pure Natural and Perfection Pulverized at the following prices: Pure Natural, 10-lb. packages at 50 cts.; 25 lbs. at \$1; 50 lbs., \$1.75; 100 lbs., \$3. Perfection Pulverized, 50 lbs., \$1.25; 100 lbs., \$2.25; ton, \$40.

DIRECTIONS—For mixing with soil, take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons of water, which can be used with safety daily if necessary.

Salt. Used as a top-dressing for lawns and asparagus beds. Price, 100 lbs., 75 cts.; ton, \$10.

Soot, Imported Scotch. Prevents mildew when mixed with sulphur at the rate of one-third sulphur and two-thirds soot; also a good fertilizer. Per 100lb. bag, \$3.

Sulphate of Ammonia. (Best.) White or gray. 24\\\3 to 25\\\4 per cent ammonia. Price, 10 lbs., 60 cts.; 100 lbs., \$4; ton, \$75.

Stockbridge Special Manure. The Stockbridge special complete manures were the original special fertilizers sold in this country. They are each especially adapted for the crop designated. The following are the leading brands: Corn and Grain, Grass Top-Dressing, Seeding Down, Lettuce and Spinach, Celery, Asparagus, Potatoes, Onion, Roots, Pea and Bean, Vegetable, Vines, Fruit Trees and Strawberry and Small Fruits. Per 100 lbs., \$2; per ton, ask for special price.

TERLINGW

DERFO HELLER

STERLINGHORD LAWN COMPOUND

FERTILIZERS, continued

Sulphate of Potash and Magnesia. 48 to 52 per cent sulphate of potash, 35 to 40 per cent sulphate of magnesia. Price, 10 lbs., 40 cts.; 100 lbs., \$2; ton, 835

Sulphate of Potash, High Grade. 90 to 95 per cent sulphate of potash, 48 to 52 per cent actual potash. Price, 10 lbs., 50 cts.; 100 lbs., \$3.25; ton, \$55.

Swift's Lowell Animal Fertilizer. A Complete Manure for all Crops. This brand is an unsurpassed all-round fertilizer, and we confidently recommend it as an unequaled crop-producer for general crops. 50-lb. bag, \$1; 100-lb. bag, \$1.75; ton, \$32.

Swift's Lowell Potato Phosphate. A moderate cost fertilizer for potatoes, used largely in Aroostook County, Maine. Will grow potatoes quickly and will feed the crop during its entire growth. Its potash is in the form of sulphate, which produces the best quality of potatoes. 50-lb. bag, \$1.30; 100-lb. bag, \$2.25; ton, \$37.

Vine, Plant and Vegetable Manure, Thomson's A safe and reliable food and stimulant for every fruitbearing plant, also for foliage flowering plants and vegetables. Prices: 1-8-cwt. (14 lbs.), \$1.25; 4-cwt. (28 lbs.), \$2.25; ½-ewt. (56 lbs.), \$4; 1-ewt. (112 lbs.),

INSECTICIDES AND FUNGICIDES

Ant Exterminator. Q. R. S. For the destruction of ants in lawns and pleasure grounds. In three sizes. 25 ets., 50 ets. and 75 ets. each, postpaid.

Arsenate of Lead. The latest and best-known in-secticide for all leaf-eating insects. It adheres to the foliage for weeks, thus making frequent spraying unnecessary. Lb.-jars, 20 cts.; 5 lbs., 90 cts.; 10 lbs., \$1.60; 20 lbs., \$3; 50 lbs., \$6.50; 100 lbs., \$12.

Aphis Punk, Nikoteen. Destroys green fly, thrip, etc., in greenhouses. Pkg., 60 cts.; case of 12 packages, \$6.50.

Aphine. For the destruction of the green, black and white fly, thrips, red spider, mealy bug, caterpillars, scale, etc. It is a combination of essential and ethereal oils combined with nicotine in a readily soluble and available form and can be applied as a spray, wash or dipping solution. It is used at an average strength of one part Aphine to forty parts water. Full directions on each can. While admittedly a powerful insecticide it does not affect the most tender growth of plants. Qt. \$1, gal. \$2.50.

Bordeaux Mixture, Sterlingworth. A concentrated mixture for use with water. Properly compounded, the value of Bordeaux Mixture cannot be overestimated. That which we offer has been manufactured from the same formula for years and has given universal satisfaction. One gallon makes from 20 to 50 gallons (depending for what it is to be used) by simply add-

ing water. Explicit directions for use on every can. Prices: 1-quart cans, 35 cts. each; 1-gallon cans, \$1

each; 5-gallon cans, \$4.50 each.

Bug Death. A non-poisonous powder. 1-lb. pkg., 15 ets.; 3-lb. pkg., 35 ets.; 5-lb. pkg., 50 ets.; 12½-lb. pkg., \$1.

Burlap. See page 76

Eureka Fly Killer. Protects cattle and horses from flies. A sure and harmless preventive, easily applied with a sprayer. Gal. \$1.

Copper, Ammoniated Solution of. A liquid fungicide, ready for use. Dilute at the rate of I quart to 25 gallons of water, and spray lightly. Qt., \$1; gal., \$2; kegs and barrels, \$1.75 and \$1.50 per gal.

Creosote, Gipsy Moth. For the destruction of the eggs of gipsy moth. Qt., 20 cts.; gal., 50 cts.; 5 gals., \$2.25; in barrels at 40 cts. per gallon.

Fir-Tree Oil. For destroying all insects and parasites that infest fruit trees, plants and animals. Small bottles, 25 cts.; ½ pt., 50 cts.; pt., 75 cts.; qt., \$1.25; 2 qts., \$2.25.

Grape Dust. For destroying mildew on grape-vines and trees affected with mold, mildew or rust mites. 5-lb. pkg., 35 cts.

Gishurst Compound. Box, 60 cts.; by mail, 80 cts.

Hellebore, White Powdered. For the destruction of rose slugs and currant worms. Very effectual. ½-lb. pkg., 15 cts.; 1-lb. pkg., 30 ets.

Kerosene Emulsion, Sterlingworth. A valuable remedy against scale and all soft-bodied and sucking insects, such as plant lice, leaf aphis, woolly aphis, San José scale, thrip, celery aphis, squash bug, leaf hopper, mealy bug, cabbage worms, etc. Sterlingworth Kerosene Emulsion should not be compared in effectiveness with the emulsion offered under the name of Kerosene Emulsion. Formerly these

have been prepared from kerosene, a cheap grade of hard soap and water. Emulsions made from this material cost less but are much less efficient. Our preparation is made from whale-oil soap and water-white oil. While this is more expensive, the resulting emulsion is more stable and far more effective as an insecticide. Prices: 1-pt. cans, 25 cts. each; 1-qt. cans, 40 cts. each; 1-gal. cans, \$1 each; 5-gal jackets, \$4.50 each.

Compound, Sterlingworth. It destroys dandelions, plantain, chickweed and all weeds with hairy surfaces or broad leaves. It is a dry, sandy powder to be applied by sprinkling over the grass. Five pounds will dress 500 to 700 square feet, depending on the condition of the lawn. Full directions for use on each package. Prices: 5-lb. cans, 60 cts. each; 10-lb. cans, \$1 each; 50-lb. kegs, \$4 each; 100-lb. kegs, \$7.50 each.

Lemon Oil. A cheap, safe and effectual insecticide. Dilute with water 30 to 50 parts. ½ pt., 25 cts.; pt., 40 ets.; qt., 75 ets.; 2 qts., \$1.25; gal., \$2.

London Purple. Lb., 20 cts.

INSECTICIDES AND FUNGICIDES, continued

Lime-Sulphur Solution (Grassellis'). Will completely destroy San José scale. A clear, cherry-Will comcolored liquid guaranteed to be free from all worthless sediment, and contains the highest percentage of lime and sulphur possible in solution, and, if not exposed to the air, will remain so a long time. Booklet upon request. Qt. 40 cts., gal. 75 cts., 5 gal., \$2.50, 50-gal. bbls., 25 cts. per gal.

Nicoticide Fumigating Compound. For killing all kinds of insects on plants in greenhouses and frames. Sold in cans as follows: Gal., \$15; \frac{1}{2}\text{-gal.}, \$8.25; No. 1, 1 pt., sufficient for 32,000 cubic feet of space, \$2.50; No. 2, ½-pt., \$1.25; No. 3, 4 ozs., 70 cts. Fumigators, 50 cts. each, consisting of three parts-

the pan, wire frame and lamp.

"Nico-Fume" Tobacco Paper. (Registered). Nico-Fume" is posi-For fumigating greenhouses. tively the strongest Tobacco Paper on the market. Packed in special friction-top tins, and is sold as follows: 24 sheets, 75 ets.; 144 sheets, \$3.50; 288 sheets, 86.50.

"Nico-Fume" Liquid. A nicotine solution of exceptional purity. Does not stain nor injure blooms nor leave a disagreeable odor. 4-pt., 50 cts.; pt., $$1.50; \frac{1}{2}$ -gal., \$5.50; gal., \$10.50.

Nikoteen. A liquid to be used in spraying or vaporizing. Pt. bottles, \$1.50 each; 5 for \$7.

Persian Insect Powder. ½-lb., 25 ets.; lb., 50 ets.

Paris Green. Strictly pure. Lb., 35 cts.

Pyrox, Bowker's. Serves the double purpose of killing insects and preventing fungous diseases and blemish of fruit. Adheres to the leaf in spite of heavy rains. 5-lb. can, \$1; 10 lbs., \$1.75; 25 lbs., \$4; 100 lbs., \$15.

Richard's X L All, Liquid Insecticide. Destroys mealy bug, red spider, etc. Pt., 65 cts.; qt., \$1; 1/2-

Richard's X L All, Vaporizing Compound. A safe, cheap, effectual material for the destruction of insects in greenhouses. Costs 25 cents per 1000 cubic feet. Bottle, sufficient for 20,000 cubic feet, \$4.50; sufficient for 40,000 cubic feet, \$8. Vaporizing fumigator for same (Richard's), \$1.10.

Scalecide. For the destruction of San Jose scale and all soft-bodied insects. Qt., 40 cts.; gal., \$1; 5 gal.,

\$4; 10 gal., \$7; 30 gal., \$16; 50 gal., \$25.

Slug Shot, Hammond's. Destroys insects injurious to house and garden plants, vegetables and fruit of all kinds. Directions for use on each package. 1-lb. cartons, each, 12 cts.; 5-lb. pkg., 25 cts., 10-lb. pkg., 50 cts.; 100-lb. pkg., \$4.50

Soap, Sulpho-Tobacco. 3-oz. pkg., 10 cts.; mailed postpaid, 13 cts.; per doz., \$1; ½-lb. pkg., 20 cts.;

mailed postpaid, 28 cts.; per doz., \$2.

Soap, Whale Oil. Excellent for destroying insects on plants, trees, vines, etc. Lb. pkg., 15 cts.; 2-lb., 25 cts.; 5-lb., 50 cts.; 10-lb., 90 cts.; 100-lb., \$8.50.

Soap Spray, "Imp." The base is pure soap. It

contains vegetable poisons, harmless to plants, but peculiarly effective against red spider on fruits, etc., the rhododendron fly, rose bug and other insect pests on fruits, flowers and foliage. It sticks, but can be easily washed off before marketing.
makes 12 gallons of spraying fluid.
\$1.50: 5 gals., \$6; 10 gals., \$10.
Specially recommended and very effective in killing the White Fly.

Soap, Whale Oil and Tobacco, Sterlingworth. Sterlingworth Whale Oil Soap

-"STERLINGWORTH"

WHALE OIL SOAP

WITH TOBACCO

Sterling Chemical Company

and Tobacco is a most effective, reliable, simple and cheap preparation for destroying San Jose scale, plant lice, and all sucking insects on trees shrubs, plants, vines, rose bushes, etc. Efficiency is increased by addition of tobacco extractive matter and potash. This preparation pos-

Sulphur, Flowers of. Prevents mildew on grapevines, bushes, etc. Lb., 8 cts.; 5 lbs., 25 cts.

Sulpho-Napthol. Of value as a disinfectant as well as an insecticide. 8-oz bottle, 50 cts.; qt., \$1.

Tobacco Dust. Lb., 10 cts.; 5 lbs., 20 cts.; 100 lbs., \$3.

Tobacco Extract, "Rose Leaf." A concentrated extract for use in greenhouses. Can be used by vaporizing or applying on the pipes with a brush. Diluted with water it can also be applied with a sprayer. Qt., 60 cts.; gal., \$1.50; 5 gals., \$5.

Tobacco Stems. For fumigating. Valuable also when used as a mulch for rose beds. Small quantities, per lb., 5 cts.; in bbls., per lb., 3 cts.; large bales

or cases, per lb., 2 cts.

Tree Tanglefoot. A safeguard for trees, shrubs, etc., against the gipsy moth and canker worm. It should be applied before the foliage appears; a continuous band 2 inches in width and 1-16 to 1-8 inch in thickness being put around the trunk of the trees, 3 or 4 feet from the ground. Remains sticky during hot, cold and wet weather. Lb., 30 cts.; 3 lbs., 85 cts.; 10 lbs., \$2.65; 20 lbs., \$4.80.

Weed Killer, Sterlingworth. A most satisfactory and powerful weed-killer, compounded especially for use on walks, drives, tennis courts, etc. It is a powder to be dissolved in water. It completely destroys all kinds of grass, briers, thistles, poison ivy, etc., when applied. One gallon covers three to four square yards, and can be applied with an ordinary watering pot. Lb. (makes 15 gallons), 50 cts.; 3-lb.

pkg., \$1.25; 5-lb. pkg., \$2.

Worm Eradicator, Carter's. For lawns, putting greens, tennis courts, etc. An English preparation which not only destroys all worms in the soil but is a fertilizer of great merit. It is free from chemicals and harmless to animals. Per 100 lbs., \$5; ½ ton, \$40; ton, \$75.

Worm and Ant Destroyer, "Imp." A poisonous liquid, absolutely harmless to grass. One gallon makes 120 gallons of spraying liquid. Upon spraying the ground, worms and ants immediately rise to the surface. They are raked off and burned. Astonishingly effective on golf-greens, lawns and flower-borders. Qt., 75 cts.; gal., \$2; 10 gals., \$20.
